I Am a CTE Advocate!

The most effective advocacy tool for Career and Technical Education is ME!

Becoming an advocate is one of the most important actions I can take to secure the future of CTE. The members who represent me in Congress, my local mayor, and my local school board members are all individuals who make decisions that direclty or indireclty affect CTE.

Now is the time for me to advocate for CTE. I will reach out to policymakers at the local, state, and federal levels, as well as in my community, to share my positive CTE story.

By being a CTE advocate, I can help ensure the strength and future of CTE!
