Utah Core State Standards Prerequisite Knowledge Tests

The Utah State Office of Education (USOE) has created a series of prerequisite knowledge tests for Utah public educators. The English language arts and mathematics tests were developed during the summer of 2012 and are primarily focused on bringing students up to speed in the first few years they are implementing the new Utah Core State Standards. The purpose of each test is to help teachers determine gaps in student understanding of curriculum from prior years. Finding and diagnosing these gaps will assist teachers in providing appropriate background knowledge when students are learning extensions or new material based on missing concept understanding. Science prerequisite knowledge tests, pre-tests, and Intended Learning Outcome (ILO) tests were developed in 2007 for secondary grades/courses.

Enrollment Codes

Each test is available via the UTIPS Core system. The below table provides the enrollment code necessary to access the test(s) developed for each subject and grade/course and the availability of each test. Educators may join organizations prior to tests becoming available.

Subject	Grade/Course	Enrollment Code	Test Available
English Language Arts	3rd	Taste64	Yes
English Language Arts	4th	Like92	Yes
English Language Arts	5th	Wait90	Yes
English Language Arts	6th	Usual51	Yes
English Language Arts	7th	Dance96	Yes
English Language Arts	8th	Along18	Yes
English Language Arts	9th	Have11	Yes
English Language Arts	10th	Even79	Yes
English Language Arts	11th	Human99	Yes
English Language Arts	12th	Fill98	Yes
Mathematics	3rd	House16	Yes
Mathematics	4th	Wide73	Yes
Mathematics	5th	Train30	Yes
Mathematics	6th	Town22	TBD
Mathematics	7th	Held60	Yes
Mathematics	8th	White66	Yes
Mathematics	Secondary 1	Tore47	Yes
Science	3rd	Inch38	Yes
Science	4th	Green37	Yes
Science	5th	Threw72	Yes
Science	6th	Equal37	Yes
Science	7th	Crowd23	Yes
Science	8th	Glue25	Yes
Science	Earth Systems	Allow92	Yes
Science	Biology	Heart29	Yes
Science	Chemistry	Paid86	TBD
Science	Physics	Part90	TBD

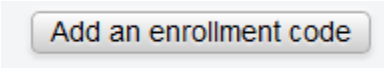
Current as of October 12, 2012

Joining the Appropriate Statewide Organization (Continued)

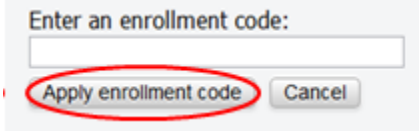
If an educator already has a UTIPS Core account:

- Log in
- Select "Settings" from the "Navigation – Configuration" pane

- Select "Add an enrollment code"



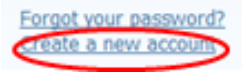
- Enter the appropriate enrollment code and select "Apply enrollment code"



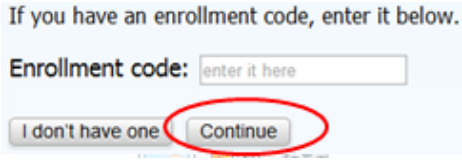
- Repeat the above steps if additional enrollment codes are needed

If an educator does not have a UTIPS Core account:

- Go to http://utips.org
- Click on "Create a new account"



- Enter the appropriate enrollment code and select "Continue."

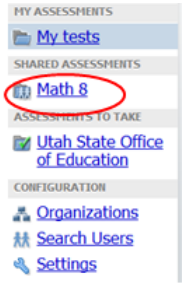


- Follow the "if an educator already has a UTIPS Core account" steps if additional enrollment codes are needed.
- Contact your district or school UTIPS Core trainer, or the UTIPS Core helpdesk (help@utips.org) to receive an additional enrollment code for your Utah public school. Note: Accounts which are not affiliated with a UTIPS public school within four months of creation may be deleted.

Accessing Tests

Once the appropriate enrollment code has been applied, a "Shared Assessments" menu will be added to the Navigation pane within your UTIPS Core account.

- Select the desired grade/course



- Select the appropriate test and assign students as participants.

Note: Students must first be added to your "Organizations" before they can be assigned to any UTIPS Core test. For assistance in using UTIPS Core, please contact your district or school UTIPS Core trainer or the UTIPS Core helpdesk (help@utips.org).

Test Administration

Students interact with these tests in the same manner they interact with other UTIPS Core assessments.

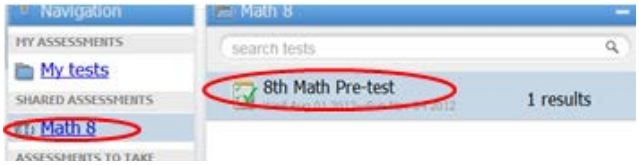
Some tests have constructed response questions. The UTIPS Core system can collect student text responses, however some mathematics items may require students to draw (e.g., graphing). For these items, students should provide their responses outside of the UTIPS Core system.

Test Scoring and Reporting

The UTIPS Core system automatically scores student responses for multiple choice items.

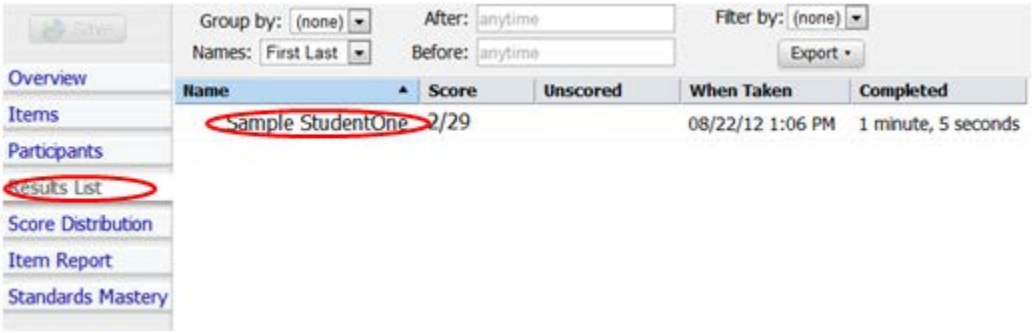
Student responses to constructed response items that are entered as text may be viewed by the educator. Student responses collected outside of UTIPS Core must be handled and scored by the educator. Once the educator determines the appropriate score for each constructed response item, it is entered into the UTIPS Core system.

- From within the educator's account, select the test from the "Shared Assessments" menu and select the Test Name.

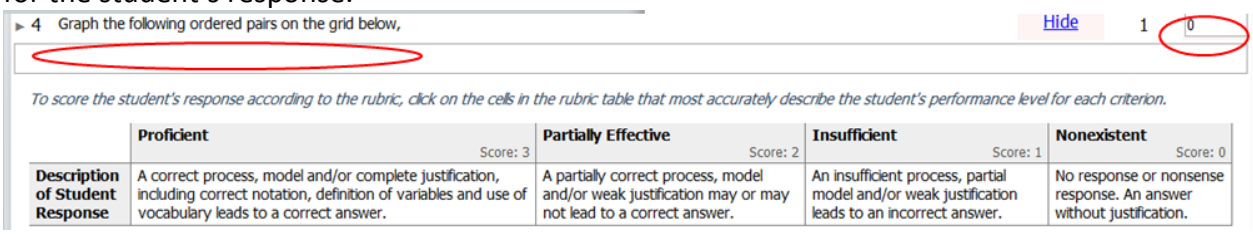


Test Scoring and Reporting (Continued)

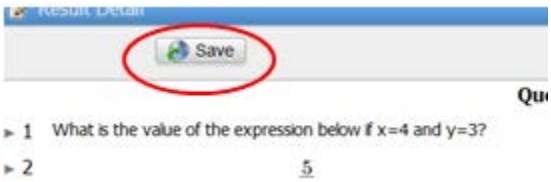
- Select "Results List" and select the student for whom scores should be recorded.



- The selected student's test and appear. Select "Show" for each constructed response item to show the student's response and any available scoring guide. Enter the score for the student's response.



- Select "Save" frequently.

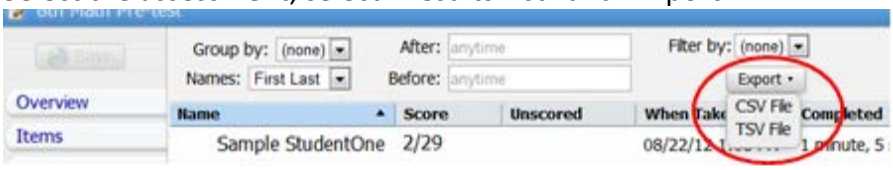


- Once "Save" has been selected, UTIPS Core reports for this test are updated to reflect new scores.

Student Data Management

UTIPS Core is not a long-term student data system. Student results are purged each year and class changes during the year (e.g., semester courses) may impact an educator's ability to view results appropriately (e.g., groups, filters). Educators may export UTIPS Core results.

- Select the assessment, select "Results List" and "Export."



Questions and Support

Questions concerning each test's purpose or content should be directed to the USOE's Teaching and Learning or Assessment and Accountability section (801-538-7500).

English Language Arts, Grades 3 – 5:	Tiffany Hall or Kurt Farnsworth
English Language Arts, Grades 6 – 11:	Christelle Estrada or Kurt Farnsworth
Mathematics, Grades 3 – 6:	David Smith or Jennie DeFriez
Mathematics, Grades 7, 8 and Secondary 1:	Diana Suddreth or Nolan Fawcett
Science, all grades/courses:	Sara Young or Brad Talbert

Note: USOE email addresses are structured: firstname.lastname@schools.utah.gov

For assistance in using the UTIPS Core system, please contact your district or school UTIPS Core trainer or the UTIPS Core helpdesk (help@utips.org).
