

## MILK CALCULATION TABLE

*Use the table(s) below as an edit check to calculate if the number of gallons of milk purchased are enough to meet the serving requirement. If not enough gallons were purchased than the center needs to go back and check for any problems in meal service.*

*The edit check can be done by the month or by the week.*

Enter the total number of B, L, D's served for each age group: 1-2 year old's, divide meals by 32; 3-5 year old's, divide meals by 21.3; 6-12 year olds, divid meals by 16; Total goes in box #1.

Enter the total of snacks served with milk for each age group: 1-5 year old's, divide meals by 32; 6-12 year old's, divide meals by 16; Total goes in box #2.

Total all gallons for week by adding boxes #1 and #2. Total month by adding each week.

MILK	1-2 yrs.	3-5 yrs.	6-12 yrs.	B,L,D ttl gal needed #1
# meals				
# gal needed				

Obtain the above information from the daily meal production records

SNACK	1-5 yrs.	6-12 yrs.	Snacks with milk ttl gal needed #2
# meals			
# gal needed
