PREFACE

A Guide for the Placement and Evaluation of Foreign-Born Students is a resource provided by the ESOL/Migrant/Immigrant Programs of the School District of Manatee County, with portions reprinted with the permission from the School Board of Broward County and Palm Beach County, Florida. As the face of our world changes, so do the educational systems of foreign countries. This guide contains current information from World Higher Education Database (International Association of Universities) and World Data on Education Seventh Edition 2010/2011 (UNESCO).

Users are encouraged to research the country's education system to see if any information has changed since the date of this edition (November, 2013).

Additional search for the Department or Ministry of Education for the country in question is recommended.

Useful resources:

1. <http://www.ocmboces.org/tfiles/folder732/Evaluating%20TEXT%20%282%29.pdf>

(Maktabeh Motevaseteh) Entrance exam (academic or vocational) - 7th	7th
8th	8th
High School (Doreyeh Aali) - 9th	9th
10th	10th
11th	11th
12th -Baccaluria	12th - Standard High School Diploma

Grading Scale

U.S. Equivalent

9-10	Excellent 4	90%	A
7-8	Good 3	80%	B
5-6	Fair 2	70%	C
3.5-4	Poor 0	55%	D
0-3	Failure 0	50%	F

Grading Remarks

Marking is on a percentage scale: 40 per cent is the minimum pass mark for individual subjects; the minimum average is 55 per cent of the sum of the highest marks for all subjects.

Country Notes

Primary education lasts for six years and is compulsory. However the draft Constitution recommends that there be nine years of compulsory education. Admission to secondary education is, at present, based on an intra-school examination not a national Baccaluria. Secondary education covers six years divided into two three-year cycles: grades 7 to 9 in middle school (Maktabeh Motevaseteh) and grades 10 to 12 at high school (Doreyeh Aali). At the end of the first cycle, pupils sit for an examination. At the end of the second cycle, they sit for intra-school examinations. Technical secondary education is offered in the lower and upper secondary cycle at middle schools in such subjects as Commerce, Applied Arts, Teacher Training, Agriculture and Civil Aviation. Courses lead to a Baccaluria equivalent level qualification. A structure of eight years of general basic education followed by four years of secondary education had been introduced for a few years during the educational reform of 1975.

6-gjashte	satisfactory	C
5-pese	lowest passing grade	C
4-kater; 3-tre, tri; 2-dy; 1-nje	poor	F

Grading Remarks

Upon completion of grade 8, the Provime Lirimi (Leaving Examination) is required. All students are tested in language, literature and mathematics. Those who pass the examination receive the Dëftesë Lirimi (Certificate of Leaving), which is required to continue studies in middle school. If the examinations are failed, students may retake the examinations.

Country Notes

Basic education lasts for eight years, divided into two cycles of four years each and leads to the Dëftesë Lirimi (Leaving Certificate). Secondary education consists of the ninth through twelfth grades, which are taught in the shkollë e mesme (high school). The Dëftesë Pjekurie (Maturity Certificate) is awarded at the end. Access to higher education requires the passing of an entrance examination. Admission to high school requires a Dëftesë Lirimi (Leaving Certificate) from a shkollë 8-vjecare (eight-year school).

10 - 10.9	Moyene (Sufficient)	C
9 - 9.9	-	*

Grading Remarks

Ma*y be considered passing grade if entire year is passed.

Country Notes

Basic education (Enseignement fondamental) lasts for nine years and leads to the Brevet d'enseignement fondamental. Secondary education is compulsory and consists of a three-year cycle of study provided in secondary schools and technicums. There are two branches of secondary education: general and specialized and technical/vocational. Students in general secondary and specialized secondary education study for three years. Successful students are awarded the Baccalauréat de l'Enseignement secondaire in one of the various streams offered. The Baccalauréat gives access to higher education but some institutions require it to be of a certain type (science, arts, etc.). The objective of technical and vocational secondary education is to prepare students for active life and industry (technicians and qualified workers). Studies last between one and four years, according to the type of training undertaken and can also lead to the Baccalauréat technique and higher education.

Grading Remarks

Passing is a grade of 4 or higher.

Country Notes

The first years of education begins with "jardin de infantes" (kindergarten), for children 3 to 5 years old, some under 3. Only the last year of kindergarten, when the child is 5 years old, it is compulsory. Therefore, when students from Argentina arrive at our schools with transcripts from kindergarten, it is NOT equivalent unless the child was 5 years old in the last year of kindergarten. Basic general education is compulsory and lasts for nine years leading to the Certificado de Educación General Básica.

Secondary education consists in the last cycle of basic general education and polymodal education. It leads to the Bachillerato. In parallel to the polymodal cycle, there is a technical-professional track which leads, after a further year's study, to the title of Técnico. Some schools provide a course lasting one year longer leading to the Bachillerato especializado.

Grading Remarks

IMPORTANT: only the most common grading scale is shown above. For grading scales in individual states and territories go to: <http://www.classbase.com/Countries/Australia/Grading-System>

Country Notes

Control of education is vested in the six states and two internal territories. The age at which children may attend school is decided within each jurisdiction. Primary school typically lasts 6 years. There are no standard examination requirements for progression through primary school, and no formal certificates are awarded. Secondary school lasts 5-6 years. The first year or two years of secondary school cover a general program. In later years students take a core group of subjects and electives. Senior secondary school covers Years 11 and 12.

On 1.1.2010 all States and Territories implemented the National Youth Participation Requirement which includes:

- a mandatory requirement for all young people to participate in schooling until they complete Year 10
- a mandatory requirement for all young people that have completed Year 10 to participate full-time (at least 25 hours per week) in education, training or employment or a combination of these activities until age 17

Grading Remarks

Country Notes

Voluntary preschool education is provided in nurseries (0-3 years) and kindergartens (3- 5/6 years of age). Elementary education lasts for four years (Grades 1 to 4). It is followed by primary education which lasts for five years (Grades 5 to 9) and leads to the Certificate of Primary Education. Secondary education or high school lasts for two years (Grades 10-11). At the end, pupils receive a Certificate of General Education. To enter universities, they must pass a National Entrance Examination. After Grade 9, pupils may opt for specialized secondary education and enter professional lyceums, where they study for three years, or technical and vocational schools, where they study for one or two years. Professional lyceums offer both vocational and general education courses while the others only offer technical/vocational courses. After passing a State final examination, pupils are given the title of "minor specialists".

E, 0.00	21% - 34%	F
F, 0.00	below 21%	F

Grading Remarks

The Bahamas General Certificate of Secondary Education (BGCSE) is modeled on The General Certificate of Secondary Education (GCSE) exams taken in England and Wales, and are accredited by Cambridge University in England. The grading is on a scale of A to G, to demonstrate a broad range of achievement. However, most universities and colleges, including The College of The Bahamas, view 'C' or above as an acceptable result for those wishing to continue their studies.

Country Notes

Primary education lasts for six years. Secondary education usually covers five years and is divided into a three-year junior high school course and a two-year senior high school course. At the end of junior high school, pupils take the Bahamas Junior Certificate examinations. At the end of senior high school, pupils take the Bahamas General Certificate of Secondary Education examinations. Pupils can also take external (non-national) examinations such as the GCE 'A' level, the SAT, etc, designed by overseas institutions and administered by the Testing and Evaluation Section of the Ministry of Education.

Grading Remarks**Country Notes**

Primary education includes the first two cycles of basic education (grades 1-3 and 4-6) for children ages 6-11. The third cycle of basic education is called intermediate education and lasts three years (grades 7-9). Schools are not co-educational (separate establishments for boys and girls). Secondary education lasts three years (grades 10-12). A student has a choice to pursue different curricula (scientific, literary, commercial, applied and technical). Some tracks within the curricula are available to boys or girls only. A total of 156 credit hours is needed to graduate, except for the technical where 180 credits are needed. Religious education is offered for boys only. It is the same as the basic and general secondary levels, with the same duration of study and admission age, but it emphasizes Islamic studies to prepare men with an appropriate background in religious affairs.

Students with an average of 75% or above are awarded a 'Star' and those with at least 80% in each subject are awarded a 'Letter'.	
Country Notes	
<p>Primary education lasts for five years. No certificate is awarded at the end. Secondary education is divided into three cycles. Admission to the three-year junior secondary cycle is based on an entrance examination conducted by individual schools. On completion of class 8, pupils proceed to the secondary cycle and may follow two years of secondary education courses or technical/vocational courses offered at trade/vocational schools. In class 9 students are separated into two streams: science and humanities. On completion of class 10, they take the Secondary School Certificate examination (SSC), administered by the Boards of Intermediate and Secondary Education (BISE). Successful students go on to higher secondary schools which offer the following options: Arts, Commerce, Home Economics, Islamic Studies, Music, and Science, including pre-medical, pre-engineering and agricultural options. On completion, they sit for the Higher Secondary Certificate (HSC). Students opting for technical education in class 10 study for three years at Polytechnic Institutes where they obtain a Diploma in the following fields: Surveying or Civil, Mechanical, Electrical, Electronic, Architectural, Chemical, Printing, Ceramic or Power Technology. Inparallel to the main stream of formal education, there are 5 stages of Madrasah education system (Islamic Education) with 5-year Ebtedayee, 5-year Dakhil, 2-year Alim, 2-year Fazil and 2-year Kamil courses. The Madrasahs are required to adopt national curricula as a condition of government recognition and support. Students are required to sit for the Public Examinations after completing courses of each level, except Ebtedayee</p> <p>System of Education: http://www.ibe.unesco.org/fileadmin/user_upload/Publications/WDE/2010/pdf-versions/Bangladesh.pdf</p>

Country Notes

Barbados is affiliated with the University of the West Indies. The supreme authority of the University is the Council, which comprises representatives of member territories, professors and appointed members. The Senate, composed of teaching members of the University, is responsible for academic decisions. Deans of faculties are elected yearly. The University is autonomous. More than 90 per cent of its resources come from contributing territories. Other higher Institutions include Barbados Community College, Erdiston Teacher's College, and the Samuel Jackman Prescod Polytechnic.

Grading Remarks

Since 2000 some secondary schools use the following system: 5: Excellent (10-9); 4: Good (8-7-6); 3: Satisfactory (5 4-3); 2: Unsatisfactory (2); 1: Totally Unsatisfactory (1).

Country Notes

School education is divided into three levels: primary (4 years), basic (9 years) and secondary (11 years). A child can be admitted to school at 6 or 7 years of age. Primary education is given in primary schools, 1-4 grades in secondary schools and 1-4 grades in gymnasiums. Basic education is compulsory for all children. It is provided in basic schools, 5-9 classes of secondary schools and 5-9 classes of gymnasiums. At the end of basic education, a Certificate of Basic Education is awarded. 9th grade graduates have three possibilities: 1) Third stage of school education (10-11th grades); 2) Vocational/technical establishments; Technicums. In secondary education, pupils continue to study in secondary schools 10-11th grades, grammar schools or lyceums. School-leavers are given a Certificate of Secondary Education. General secondary education is provided by general secondary schools, gymnasiums, lyceums and colleges, as well as in first courses of specialized and technical schools. Gymnasiums provide general secondary education at a higher level. Lyceums provide vocationally-oriented education that completes general secondary education.

<p>Primary education lasts for six years and leads to the Getuigschrift van Lager Onderwijs (Primary Education Certificate). Secondary education is provided for young people aged 12 to 18 in four branches: ASO (general), TSO (technical), KSO (artistic) and BSO (vocational), each divided into three 2-year periods. Pupils study as many subjects as possible during basic education. From the third and fourth year of secondary education, pupils can opt for a certain branch of study within ASO, TSO, KSO, or BSO. They may also follow a 7th year after the 6th TSO, KSO or BSO year, or study for a 5th year after the 4th BSO year. In the fifth and sixth years of secondary education pupils are offered either occupational training or higher education training. From age 15/16, pupils may also attend from 1 day/week to 15 weeks/year part-time secondary education, while having signed a part-time labor or apprenticeship contract. General, vocational and technical secondary education lead to the Diploma van Secundair Onderwijs. Country Notes

Primary education lasts for eight years. Primary education is compulsory for all children between the ages of 5 and 14 years. The eight-year programme is divided into infant grades (I-II) and junior grades (III-VIII or Standards I-VI). The secondary education school system covers four offering general education and vocational or trade school offering short term courses in basic trades.

Post-secondary institutions include sixth-form establishments, offering two years of post-secondary schooling; institutions for professional training (agriculture, nursing, teaching); and the university.

Grading Remarks

*Grading scales vary. Please refer to grading scale on transcript.

Student assessment is based on special projects and class work, as well as periodic and final examinations. A student who does not successfully complete a subject will receive a dependência (deficiency) in that particular course. The number of dependências that a student may receive without repeating the entire year varies by school, with the most common standard being a maximum of two subjects.

TRANSLATIONS: **R or E or I Reprovado = Failing; M Matrícula = Registration; Cancelada = Dropped; T Transferido = Transfer Credit; T, J or S Abandono Justificado = Withdrew in Good Standing; F Incompleto = Incomplete; J Canc. De Insc. Em Disc. = Cancellation of course; K Trancamento = Withdrew.**

Country Notes

Primary education lasts for eight years, is compulsory and leads to the Certificado de Conclusão de Ensino Fundamental *(a program to extend primary education from 8 to nine years is at present underway in Brazil). Secondary education covers grades 9 to 11. Pupils may also take a course ranging from three to five years in a variety of technical and vocational fields leading to the qualification of Certificado de Auxiliar Técnico (Assistant Technician), Diploma de Técnico de Nivel Médio (Technician) or Diploma de Técnico de Segundo Grau (second level Technician). Holders of these qualifications may take the university entrance examination. Training programs have also been established in basic vocational training (Habilitação Básica) leading to a Certificado de Habilitação Básica.

Grading Remarks

Country Notes

Following an optional pre-school period, children enter primary school for 5 compulsory years. To proceed further they must successfully write a comprehensive examination in basic academic subjects. The first phase of secondary education takes place at middle schools, where students pass through grades 6 to 8 before they write their standard eight examinations. High school students entering at grade 9 may choose either an arts or science stream. All study Myanmar, English and mathematics. Arts students also study geography, history and economics, while science students concentrate on chemistry, physics and biology instead. At the end of this period students at government schools may sit for their university entrance examinations. However those at private English schools may not. Vocational training, which is largely in the hands of the private sector has become popular among young people wanting to enter the hospitality, tourism, beauty, fashion, nursing or engineering sectors. It acts as a bridge to better jobs for those with little or no work experience.

Secondary Education in Canada; A Student Transfer Guide: <http://www.cmec.ca/tguide/2004/index.en.html>

Country Notes

At the secondary level, credit systems and promotion by subject, rather than grade, is the usual custom. Secondary school diplomas are granted to students who pass the compulsory and optional courses of their programs.

* Quebec vocational schools run from X - XII or XIII Year

Secondary school covers the final four to six years of compulsory education. In most cases, vocational and academic programs are offered within the same secondary schools, with some shorter non-diploma programs for students interested in specific trades.

Grading Remarks

Country Notes

General basic education (EGB) is compulsory and lasts for eight years, divided into two cycles of four years each. From 2004, Secondary education (Educación media) is also compulsory and lasts for four years. Students choose to specialize either in humanistic-scientific education (EMHC) or technical-professional education (EMTP). The humanistic-scientific branch, offered in liceos, is a preparation for higher education. Students are awarded the Licencia de Educación Media at the end. Technical- professional education offers a two-year common course and two years of specialization divided into five branches: industrial, technical, agricultural, commercial and maritime. Students who successfully complete their secondary education obtain the Licencia de Educación Media and/or the title of Técnico de Nivel Medio.

0 - 59	0	Fail	F

Grading Remarks

The Senior High School Graduation Diploma is graded on a scale of A-D. The National Matriculation Test is marked on a percentage scale per subject, with a maximum mark for the examination of 750. Or Pass or fail basis (A,B,C,P,F)

Country Notes

Compulsory education lasts for nine years, starting at 6 or 7 years of age. Primary education lasts for six years. Secondary education extends over six years, divided into junior and senior secondary education. A graduation examination is taken at the end. Access to higher education is based on the Senior High School Graduation Diploma and a very competitive National Matriculation Test. At the moment, a reform of the National Matriculation Test is underway offering more freedom to the higher education institutions and to students in determining the subjects of the test. Online enrollment is gradually being introduced.

Also: 4.0-5.0 A, 3.5-3.9 B, 3.0- 3.4 C, 0-2.9 F		

Grading Remarks

* There are two academic calendars: "A" and "B". Calendar "A" is used by most of the country and is divided into two cycles or semesters. The first semester lasts 18 weeks, beginning in February and ending in June. The second semester lasts 20 week beginning in July and ending in November. The first semester of calendar "B" begins in September and ends in December. The second semester begins in January and ends in June. Both calendars follow a 198-day school year.

Country Notes

Compulsory education lasts for nine years. Basic primary education lasts for five years, preceded by one year of preschool education. The secondary school system covers six years divided into two cycles: the basic cycle (educación básica secundaria) covers four years and the middle secondary cycle (educación media) two years. Successful completion of studies leads to the Bachillerato. Students must pass an entrance examination, the **ICFES "Examen de Estado" (Statewide Exam)**, in order to be accepted to the university. This exam does not determine graduation from Bachillerato (upper secondary school).

Grading Remarks

In Ciclo 4 pass/fail is 65%

Country Notes

Primary education lasts for six years divided into two cycles of three years each. Secondary education covers five or six years divided into cycle 3, the last three years of basic education, and cycle 4 (or the diversified cycle) of two or three years' duration. On entering cycle 3, pupils choose an academic course or a technical/vocational program. At the end of this cycle, a Certificate is awarded. In cycle 4, pupils choose a two-year academic course or a three-year technical course. Both courses follow a core curriculum including Spanish, Social Studies, Mathematics, Science and Foreign Languages in addition to the specialized subjects. Satisfactory completion of this cycle leads to the Bachillerato, which gives access to higher education but most universities impose an entrance examination. In technical education it leads to the title of Técnico en el Nivel Medio or Bachiller en la Enseñanza Media.

**Specialized Secondary* - Gimnazija - length of program: 4 years - ages 14 -18 Diploma – organizacije medjunarodne mature (International Baccalaureate).

**Specialized Secondar* - Umjetnicka škola (Art School) - length of program 4 years, ages 14 - 18 Diploma - Svjedodžba o završnom ispitu

**Vocational* - Strukovna škola (Vocational School) - length of program 4 years, ages 14 – 18 Diploma - Svjedodžba o završnom ispitu and a vocational qualification

The eight years of primary education are divided into two stages: classes one to four and five to eight. Secondary education comprises grammar schools, vocational schools and art schools. Grammar schools are divided into general, mathematics and IT, linguistic, classical and scientific schools. Vocational schools offer courses lasting for one, two, three or four years, including a period of practical instruction. Art schools include music, dance, visual art and design. Students must pass an entrance examination to enter university in professional fields. When the State Secondary School Leaving Examination becomes operational - in 2008/9 for grammar schools, and 2009/10 for four-year vocational schools - it is expected to replace the entrance examination in most higher education institutions.

Country Notes

Primary education lasts for six years. Secondary education is divided into basic secondary education and pre-university secondary education. At the end of basic secondary education, pupils can choose between pre-university education and technical and professional education. Those who complete pre-university education are awarded the Bachillerato. Technical training leads to two levels of qualification - skilled worker and middle-level technician. Successful completion of this cycle gives access to the technological institutes.

Country Notes

Primary education lasts for seven years leading to a Leaving Certificate. Public general secondary education lasts for six years. It is divided into two three-year cycles: three years' Gymnasium, followed by three years Lykeion. Most private schools have competitive entrance examinations in Greek and Mathematics. In parallel, there is also a vocational and technical stream. The syllabus in the technical stream emphasizes Science subjects, whereas in the vocational stream technological subjects, workshop practice and industrial training are emphasized. Graduates of both streams may also proceed to tertiary institutions. The restructured Eniaio Lykeio, offering a great variety and flexibility in the choice of studies, was established on a pancyprian scale to replace the Lykeion system of optional subjects which functioned before for over 20 years. The Eniaio Lykerio is characterized by its focus on general education (including technology and economics) aiming at developing a multifaceted personality. At the Eniaio Lykeio, the A Form is for observation, guidance and orientation. In the B and C Forms, pupils attend common core courses. The Technical secondary education which is separate from the Eniaio Lykeio offers upgraded curricula.

Grading Remarks

Country Notes

Primary education lasts for nine years divided into two stages of five and four years respectively. It leads to a Vysvědčení. Secondary education comprises three main types of schools: secondary general schools (gymnasium), secondary technical schools and secondary vocational schools. Gymnasiums prepare for study at higher education institutions and for professions. The secondary technical schools and 4-year courses or three-year follow-up courses at secondary vocational schools prepare students for a wide range of professions, as well as for studies at higher education institutions. All these studies culminate in the passing of the Maturitní zkouška/Maturita. The 2-year and 3-year courses at the vocational schools prepare students for professional activities.

On January 1, 1993 Czechoslovakia split into Czech Republic and Slovakia. If a student's birthplace is listed as Czechoslovakia, follow the education system of Czech Republic above to evaluate the transcript.

Grading Remarks

Country Notes

Basic education comprises primary and lower secondary education and lasts for nine or ten years (the 10th year is optional). Upon completion of Class 9 or 10 of the Folkeskole pupils may go on to upper secondary school. The 3-year Gymnasium programme is the traditional general upper secondary programme. General upper secondary school and the more vocationally-oriented programmes "Højere

Handelseksamen" (HHX) or "Højere Teknisk Eksamen" (HTX) qualify students for higher education. HHX and HTX also prepare for employment in trade and industry - usually in training positions. Vocational programmes are mainly Erhvervsuddannelse (Vocational Education and Training, VET) and prepare directly for specific jobs. In addition, most VET programmes qualify students for direct admission to one or more short-cycle professional higher education programmes. Approximately 30-50% of the time is spent at school and 50-70% is spent as a trainee or apprentice in a business enterprise. Other vocational programmes are basic social and health education programmes (SOSU) and agricultural, forestry, home economics and maritime programmes. Education is largely the responsibility of the Ministry of Education. It shares control of the Gymnasium and Højere Forberedelseksamen (HF) with the country councils and school or course boards. It is responsible for setting up the framework for curricula at primary and secondary education level.

Country Notes

Pre-Primary Education (La Educación Inicial) is organized into three levels: the first level serves children ages 0-2 years old, the second group serves children ages 2-4 years old, and the third group serves children ages 4-6 years old. Pre-primary education is not compulsory except for the last year (the school year beginning when the child turns 5). Basic education (Educación Primaria) is compulsory for children ages 6-14. It lasts for eight years, and is organized in two cycles of four years each (Primer Ciclo and Segundo Ciclo). Secondary education (Educación Secundaria or Educación Media) is not compulsory, but it is the duty of the government to offer it free of charge. It serves children 14-18 years old. Grades 9 and 10 are the Primer Ciclo Común and then grades 11 and 12 are the Segundo Ciclo. Students can specialize in one of three areas: general (academic), technical, or the arts. Upon completion, students receiving a Bachillerato can go to a University. Students completing the technical track will receive a Perito and can go to a higher education technical school. The school year is 42 weeks long in pre-primary education and basic education, and 43 weeks in secondary education. The higher education system includes higher education institutes (all private), (los institutos de estudios superiores) and universities. The institutes offer courses of a higher technical level; the universities offer technical, undergraduate, and graduate courses.

Country Notes

Basic education lasts for ten years. It is followed by two years' secondary education is divided into three cycles. The first, of three years, is a compulsory basic cycle where students study general education. The second is called diversified and students can either study for one or two years (carreras cortas) after the basic cycle or for three years leading to the Bachillerato. The Bachillerato has options in humanities, sciences or technology. The third cycle of secondary education is one of specialization and takes place in two or three years in institutos técnicos ortecnológicos.

Grading Remarks

Country Notes

Compulsory education lasts for nine grades and is known as "basic education", split into two stages, primary school (Grades 1- 6) and preparatory school (Grades 7-9). It leads to the award of the Basic Education Completion Certificate. Following the nine- year basic education, pupils have the choice of entering a general secondary school (academic option) or a technical option including three- and five-year technical schools as well as experimental schools teaching languages, education and physical education. Only general secondary school graduates (academic option) may be admitted to university after obtaining their General Secondary Education Certificate (GSEC) or an Advanced Technical Diploma with scores above 75%. However, since 1991, some graduates from technical schools have been allowed to enter higher education.

Grading Remarks

Country Notes

Basic education lasts for nine years leading to a Certificate. Secondary education lasts for three years for the Bachillerato General and three years for the Bachillerato Vocacional. In the Bachillerato General, students take basic courses as prerequisites to entry to college. In the third year of the Bachillerato Técnico Vocacional, students take very specialized courses which help them enter the labor market.

Country Notes

General education is divided into two parts: basic education (9 years; ages 7 to 16), which is compulsory for all children in Estonia, and secondary general education. Since 1993, the Basic School Leaving Certificate, obtained at the end of basic education, provides a student with the right to continue at the next level which offers two strands (three additional years): 1) Secondary General School/Gymnasium Education or 2) Vocational Education. Upon graduation, students receive the Secondary School Leaving Certificate (*Gümnaasiumi lõputunnistus*), which gives access to higher education at a University. Students who complete the study program at the vocational secondary level are awarded the Certificate on Acquiring Secondary Vocational Education Based on Basic Education (*Tunnistus Põhihariduse Baasil Kutsekeskhariduse Omandamise Kohta*). These students can go on to a post-secondary vocational program to earn a higher education vocational certificate.

Vocational: Type of school providing this education: Vocational School and Junior College Length of program in years: 3
Age level from: 16 to: 19

Country Notes

According to the new structure of the education system, primary education lasts for eight years (age group 6-14) and is divided into two cycles: basic education (Grades I-IV) and general education (Grades V-VIII). Junior secondary schools no longer exist, as Grades VII and VIII have become the two upper classes of the second cycle of primary education. Secondary education is divided into two cycles: the first (Grades IX and X) or general secondary education, and the second cycle (Grades XI and XII) or preparatory secondary education. Since the education reform, completion of Grade X leads to the Ethiopian School Leaving Certificate Examination (ESLCE). It used to be at the end of Grade XII. The second cycle prepares students to continue their studies at the higher education level or select their profession. It offers a science option and a social science option. At the end of this cycle, students take the Ethiopian Higher Education Entrance examination to enter higher education institutions

*Technical and vocational education and training is institutionally separate from the regular education system and runs in parallel with it.

Country Notes

After completing 9-year basic education, students can choose between general upper secondary education and vocational upper secondary education: 1) general upper secondary school (lukio/gymnasiet) provides general education leading to the national Matriculation examination (ylioppilastutkinto/studentexamen), which gives eligibility to all forms of higher education; 2) vocational upper secondary education (ammattillinen koulutus/yrkesutbildning) may be organized in vocational education institutions or in the form of apprenticeship training. An (initial) Vocational Qualification (ammattillinen perustutkinto/yrkesinriktad grundexamen) takes three years to complete and gives eligibility to all forms of higher education. In vocational further education and training it is also possible to obtain Further Vocational Qualifications (ammattitutkinto/yrkesexamen) and Specialist Vocational Qualifications (erikoisammattitutkinto/specialyrkesexamen), which can only be taken as competence-based examinations and are mainly intended for employed adults.

4	4 - 6	ausreichend	C
5	1 - 3	mangelhaft	F
6	0	ungenügend	F

Grading Remarks

Highest grade = 1. Pass/Fail = 4/5. Lowest on scale = 6. Passing is a C/65% with 4 or better. Students are required to do oral and written work, practical work and receive course certificates (Scheine) needed to take the examination; this is the main performance assessment during the course.

Country Notes

Primary education (Grundschule) lasts for four years in most Länder except Berlin and Brandenburg where it lasts for six years. The secondary school system (grades 5/7 to 12/13) in the Länder is divided in educational paths (depending on the Land) with the respective leaving certificates and qualifications for which different school types and/or school careers are responsible. All types of vocational schools (grade 10/11 onwards) offer the opportunity to acquire general education certificates. There are general secondary education schools, special schools for the physically or mentally handicapped within the system of general and vocational education, and full- or part-time vocational schools (10th/11th grade on). Four main types of general secondary schools covering compulsory schooling exist: Hauptschule, Realschule, Gymnasium and Gesamtschule. Types and names of schools offering several courses of education at lower secondary level differ according to Länder. Secondary education is compulsory and tuition is free. Textbooks and other school material are either free or lent out. From grade 10, pupils may obtain grants if no other financial sources exist.

E = 5	(Pass)*	D	C7, D8	(Pass)*	D
F	(Fail)	F	F9	(Fail)	F
-----SSCE-----	U.S. Equivalent	-----WASSCE-----			

Grading Remarks

Major Educational Reform was instituted in 2007, but there are conflicting reports as to whether Ghana still has a fourth year of Senior Secondary School. If the student was in a school with a fourth year, he/she would not receive a diploma until the completion of the "13th year" of school in Ghana.

In the public schools, all students take a Core curriculum consisting of English Language, Integrated Science, Mathematics, and Social Studies. Each student also takes three or four Elective subjects, chosen from one of seven groups: Sciences, "Arts" (social sciences and humanities), Vocational (visual arts or home economics), Technical, Business, or Agriculture. The secondary school transcript should contain a letter or percentage grade for each subject, for each of three terms, for the three years of Senior High School, equivalent to the tenth through twelfth grades.

Country Notes

Grading Remarks (continued): Students' Term Reports (report cards) contain rank in class for each subject as well as grades for classwork and end of term exams. The grading system is tough: an A is rarely awarded. Transcripts with all A's are unlikely to be genuine. At the end of Senior High School (twelfth grade), all students take the West African Senior Secondary Certificate Examination, or WASSCE, (SSCE through 2005; WASSCE beginning in 2006) in each of their seven or eight subjects. These exams are given nationwide in May-June each year, but the results are not available until the following October. Grading is exceptionally tough: fewer than 3% of grades are A's, and 40% of students fail any given exam. C's and D's can be quite competitive grades.

The educational system consists of six years of primary school followed by three years of junior secondary and three years of senior secondary education at the end of which students sit for the Senior Secondary Certificate Examination. The six years of primary education and the three years of junior secondary school form the nine years of basic education.

10-11	Poor	C-/D
0-9	Failure	F

Grading Remarks

Country Notes

Primary education lasts for six years. Pupils who have completed the six years of primary school enter the lower secondary school (gymnasium), which lasts three years and completes the nine-year compulsory education program. At the upper secondary level, the lyceum offers both day-time programs, lasting three years, and evening courses, which last four years. After the 1997 reform, upper secondary education comprises: the unified lyceum, offering a three-year program with three main streams (theoretical, science and technology) starting from the second year; and technical-vocational education schools (TEE), lasting two or three years. Secondary education is provided in both public and private schools and is divided into a compulsory first cycle (Gymnasio), from age 12 to 15, and an optional second cycle (Lykeio) from age 15 to 18. No entrance examinations are required in either case.

Grading Remarks

Passing grade is 30 (D) or higher.

Country Notes

Secondary education consists of two cycles: the three-year lower cycle, or the second cycle of basic education, covering Forms I-III; and the two-year upper cycle (Forms IV and V). At the end of secondary education (general and technical), most students sit the Caribbean Examinations Council (CXC) examinations or the Cambridge General Certificate in Education, Ordinary Level examinations (GCE O-level). The School Leaving Certificate Examination (SLCE) is administered to students aged 14+ unsuccessful at the CEE, in order to give them an opportunity to access technical and vocational education training centers (two-year programs) or to provide them with a certification for a profession.

Country Notes

Primary education is compulsory and lasts for six years, divided in two cycles of three years each. A Certificate of Completion is awarded at the end. Secondary education also includes two cycles: the first or basic cycle lasts for three years and leads to diploma; the second, or ciclo diversificado, may last for two or three years according to the specialization. At the end pupils take the examinations for the Bachillerato de Ciencias y Letras (after two years). A three-year course at upper secondary level in technical education leads to the title of Perito comercial, industrial, agrícola or técnico or a teacher training qualification. The Bachillerato is a prerequisite for access to university education and most universities

F	Fail	F

Grading Remarks

Country Notes

Primary education lasts for six years. Entry to secondary schools depends on the grades obtained in the Secondary School Entrance Examination, taken at the end of grade 6. Community High Schools prepare students for the Secondary School Proficiency Examination (SSPE) in four years. General and senior secondary schools prepare for the Caribbean Examinations Council Certificate (CXC) in five years. Senior secondary schools provide courses for a further two years leading to the Caribbean Advanced Proficiency Examination (CAPE) or the General Certificate of Education Advanced Level. Vocational education is available in the Industrial Arts, Home Economics and Agricultural Sciences. The Guyana Technical Education Examination is awarded.

Grading Remarks

*Failing grades underlined on report cards. **Formula** for figuring grade when NOT on a 10, 20 or 100 point scale: figure subject grade average for the year, then DIVIDE the average by the **SUR** or **MAXIMUM** (sometimes it is 30, 50, 200, 300 etc.). This will give you the grade equivalent using the HUNDRED point scale. **MOYENNE** = GPA (10 Point Grade Scale)
"admise en" = promoted to "retenu" = retained (very very rare)

Country Notes

In the traditional system, primary education lasts for six years, in the reform system, it is replaced by fundamental education which lasts for nine years. Fundamental education is composed of three cycles of three years each. The first two cycles constitute primary (basic) education, and the third one corresponds to the first cycle of the traditional secondary level. At present, the educational reform has not yet been generalized and the traditional system still prevails. Based on the French system, secondary education lasts for seven years and is divided into two cycles (three and four years). The Baccalauréat 1e partie is a certificate awarded after succeeding in the state examination at the end of the third year of the second cycle. The Baccalauréat 2e partie, taken at the end of the fourth year, is a state diploma that marks the end of the secondary level. The new secondary system that should follow the nine years of fundamental education has not yet been introduced.

8.75-10.00	19-20	90-100	Tres Bien/Excellent	A
7.50-8.74	17 - 18	80 - 89	Bien/Very Good	B
6.25-7.49	14-16	65-79	Assaz Bien/Good	C
5.00-6.24	11-12	50-64	Passable/Pass	D
0.00-4.99	0-10	0-49	Nul/Mal/Poor	F

Grading Remarks

*Failing grades underlined on report cards. **Formula** for figuring grade when NOT on a 10, 20 or 100 point scale: figure subject grade average for the year, then DIVIDE the average by the **SUR** or **MAXIMUM** (sometimes it is 30, 50, 200, 300 etc.). This will give you the grade equivalent using the HUNDRED point scale. **MOYENNE** = GPA (10 Point Grade Scale)
"admise en" = promoted to "retenu" = retained (very very rare)

Country Notes

In the traditional system, primary education lasts for six years, in the reform system, it is replaced by fundamental education which lasts for nine years. Fundamental education is composed of three cycles of three years each. The first two cycles constitute primary (basic) education, and the third one corresponds to the first cycle of the traditional secondary level. At present, the educational reform has not yet been generalized and the traditional system still prevails. Based on the French system, secondary education lasts for seven years and is divided into two cycles (three and four years). The Baccalauréat 1e partie is a certificate awarded after succeeding in the state examination at the end of the third year of the second cycle. The Baccalauréat 2e partie, taken at the end of the fourth year, is a state diploma that marks the end of the secondary level. The new secondary system that should follow the nine years of fundamental education has not yet been introduced.

3	Bueno/Good	60-79%	C
4	Aplazado/Fail	40-59%	D
5	Insuficiente/Insufficient	1-39%	F

Grading Remarks

Passing is a grade of 60% or higher.

Country Notes

Primary education lasts for six years and is free and compulsory. Secondary education covers five years divided into a ciclo común/lower cycle or a ciclo común pre-vocacional and an *upper cycle of two years called ciclo diversificado. In the upper cycle, pupils may specialize in literary or scientific streams. On completion, they sit for the Bachillerato. *Technical secondary education at upper cycle level lasts for three years. Various specializations are available. Courses lead to the titles of Perito/Bachillerato in the various streams. There is also a distance education system.

HONG KONG

Diploma Awarded
Hong Kong Certificate of Education Examination (HKCEE) (at the end of fifth form)

Hong Kong Advanced Level Examination (HKALE)- Requirement for entrance to post-secondary studies (taken at the end of 2 years of sixth form)

School Year September- July
Compulsory Education Ages 6-15 Grades 1-9

Educational System

U.S. Equivalent

Pre-Elementary (ages 3-5)	Kindergarten
Elementary - 1st (enter at 6 yrs old)	1st
2nd	2nd
3rd	3rd
4th	4th
5th	5th
6th	6th
Lower Secondary - Form 1	7th
Form 2	8th
Form 3	9th
Form 4	10th
Form 5 - HKCEE	11th
Form 6 (2 years) - HKALE	12th - Standard High School Diploma

Grading Scale (HKCEE and HKALE)

U.S. Equivalent

A	Pass with Distinction	75-100%	A
B,C	Pass with Credit	65-74%	B
D,E	Pass	50-64%	C
F,G,H	Fail	40-49%	F

Grading Remarks

Most common grading scale used in schools in Hong Kong is equivalent to US grading scale:

- A = excellent
- B = good
- C = adequate
- D = marginal pass
- F = fail

Country Notes

Students are continuously assessed through coursework (assignments and projects), as well as both written and oral examinations. At the end of the fifth form at the secondary cycle, students must take the Hong Kong Certificate of Education Examination (HKCEE), which will give the student access to those students wishing to pursue higher education, they will continue into Sixth form. Upon completion, a second national exam, the Hong Kong Advanced Level Examination (HKALE) is then written.

Some schools still use the British system of six years of primary school, five years of secondary Form IV. After the high school diploma is awarded, students may opt for Form VI in preparation for the university entrance examination.

Academic Secondary - Gimnázium Programme 3
Academic Secondary - Gimnázium Programme 4
Vocational Secondary - Szakközépiskola (Vocational Secondary School)
Vocational - Szakiskola (Vocational School)

Country Notes

Basic education lasts for eight years divided into two stages of four years each. Secondary education is provided in academic secondary schools (gimnázium) or vocational secondary schools (szakközépiskola). Schools often offer more than one program (e.g. academic and vocational, academic four- or six-year courses). The typical institutions offering general education and a Secondary School Leaving Certificate are known as academic secondary schools (gimnázium) and may be attended for four, five (e.g. bilingual secondary schools), six or eight years. Secondary vocational schools (szakközépiskola) and vocational schools (szakiskola) train in the fields of humanities, technical, agricultural sciences and services. Secondary vocational schools (szakközépiskola) provide general education in the first four years and award the Secondary School Leaving Certificates. Vocational education generally begins after the fourth year, although some introductory vocational subjects may also be taught during the first four years. The length of vocational courses may vary from one to three years up to vocational programs. Vocational schools (szakiskola) do not award secondary school leaving certificates and the level of the vocational qualification is lower than that in the vocational secondary schools (szakközépiskola).

	12th - Standard High School Diploma

Grading Scale

U.S. Equivalent

10	Excellent	A
8 - 9	Very good	B
7	Good	C
5 - 6	Satisfactory	D
0 - 4	Insufficient	F

Grading Remarks

* Sometimes a 5 is given a grade of E (Sufficient)

Icelandic upper secondary schools generally have examinations at the end of every semester regardless of the type of school. Certain courses have no final examination at the end of the semester and the grade is based on continuous assessment and on the assignments set.

Country Notes

Basic education lasts for ten years leading to the Grunnskólapróf Certificate. Upper secondary education covers four years and is open to anyone who has completed compulsory school. Courses lead to the Stúdentspróf. Secondary vocational education is offered by the upper secondary comprehensive schools (fjölbrotaskólar), industrial vocational schools (lönnmenntaskólar) and specialized vocational schools (sérskólar). Students can either train for the certified trades or follow vocational training in such fields as Agriculture, the Fishing Industry, the Food Production Industry or Health and Commerce. Students in vocational programs have the possibility of taking additional studies to complete the Stúdentspróf.

Examinations are set by the school or by Municipal Boards and are usually held at the end of each term and each school year.

Country Notes

The common education structure at the school level follows the pattern of '10 + 2'; ten years of basic education, followed by two years of upper secondary school. Classes and grade levels have different names depending on the state in which instruction takes place. Terminology for school leaving examinations can be confusing as it also varies.

The basic structure for schooling is comprised of eight years of elementary education; five years of lower elementary (Standards I to V), three years of higher elementary (Standards VI to VIII). This is followed by two years of secondary education (Standards IX and X). At the end of ten years of schooling a Secondary School Certificate is awarded upon passing the examinations set by the relevant State or Central Board of Secondary Education. Students who wish to continue for higher studies must complete a two-year higher secondary program (Standards XI and XII), choosing science, humanities or vocational streams, which culminates in the Higher Secondary Certificate or Standard XII examination certificate. This certificate is the minimum requirement for admission to degree programs at Indian universities. It should be noted that a variety of names exist for the final examinations of this level of education.

Country Notes

Basic education in Indonesia consists of 9 years of compulsory education. Primary education lasts for six years. Secondary education is divided into junior (Sekolah Menengah Tingkat Pertama -SMTP), senior (Sekolah Menengah Tingkat Atas -SMTA) and vocational/technical education. Junior secondary school covers three years and is part of the basic general education programme also covering the six years of primary education. Senior secondary school also covers three years. There are several types of secondary schools: general, Islamic and vocational. Sekolah Menengah Atas is divided into three sessions. In the third year of senior secondary school, students choose between Natural Sciences, Social Sciences and Languages (Bahasa). Graduates of the senior secondary schools obtain the Sekolah Menengah Atas, which is a prerequisite for access to higher education (together with an entrance exam).

Grading Remarks

Grading is based on a 0 to 20 scale with 7 as the lowest passing grade in individual subjects except Farsi, in which a 10 is required. An average grade of 10 is required for the year in order to be promoted. Students who fail must repeat the year.

Country Notes

Primary education lasts for five years leading to the Certificate of Completed Primary Education. Secondary education (Reform system) covers three years of lower secondary and three years of upper secondary and a one-year pre-university program. Secondary education comprises three branches: theoretical, technical-vocational and skill-knowledge (kar-Danesh). Each are divided into different fields. The required total number of credits leading to the High School Diploma is 96. The one-year pre-university program prepares students to enter university and higher education institutions. To enter this course, students should pass the appropriate exam. After successfully passing the one-year period, they are granted the Pre-University Certificate and can sit for the National Entrance Exam of universities and higher education institutions (Concour). Qualified students entering the technical-vocational branch can continue studies leading to the Post-Diploma degree (technician) or sit for the Pre-University Examination. Those who wish to acquire skills before completing secondary education can enter the skill-knowledge branch and obtain first or second class Skill Certificate or sit for the Pre- University Examination as well.

Grading Remarks

Note: the final intermediate stage examination is graded on a percentage scale.

The student is required to obtain at least 50 percent to pass a subject.

50 - 100 Passing = Pass 0 -49 Failing = Fail

Country Notes

Pre-school education in Iraq is of two-years duration and is open to children 4 years old. Primary education lasts six years and is compulsory through age 11. Secondary education lasts six years and is completed in two stages: Intermediate and Preparatory. Intermediate education lasts three years for students aged 12 to 14 years. Preparatory education also lasts three years and is designed to prepare students for the labor market or university study. It is divided into two branches (scientific and literary) beginning with the second year of preparatory education, during which students pursue academic studies in the sciences or humanities. In addition, there is also a six or three-year (depending on the point of entry) vocational preparatory stream of education, which covers industrial, agricultural and commercial branches. Vocational preparatory education is designed to prepare students for work in the professions or for university study.

Country Notes

Primary education lasts for six years. Secondary education covers six years divided into lower secondary (three years) and upper secondary (three years). Schools are classified according to one of three tracks: general (academic, theoretical), technological/vocational and agricultural. Students attend classes for 32-36 hours a week and may study up to 15 subjects at a time. One instructional unit is defined as approximately 90 fifty-minute instruction hours over a three-year period. On completion of Grade 12, students may sit for Bagrut exams. Requirements for the current Bagrut Certificate are 20 units in a range of 20-25 units and a minimum of 15 in compulsory subjects: Bible (2); Civics (1); English Language (3); Hebrew Grammar (1); Hebrew Composition (1); Hebrew Literature (2); and Maths (3). Additional subject (1). At least one subject exam must be taken for 5 units. A grade of at least 6 must be achieved in all major subjects. For access to universities, students must also pass the Psychometric Entrance Test (PET).

Country Notes

Elementary education lasts for five years and leads to the Diploma di Licenza della Scuola Elementare. *Secondary education covers eight years, divided into three years' lower secondary, followed by five years' upper secondary education. The upper secondary courses consist of classical, scientific, artistic, technical, vocational and teacher training options. Classical secondary school/Liceo Classico lasts for five years, with emphasis on the Humanities, but with scientific subjects in the second cycle. Scientific secondary school/Liceo Scientifico also lasts for five years, but provides more specialized preparation in scientific subjects. The Liceo Linguistico focuses on the study of foreign languages together with the corresponding literature and civilization. The technical upper secondary programs are offered by the Istituti Tecnici and last for five years. Vocational secondary education is provided by the Istituto Professionale, Liceo Artistico, and Istituto di Arte. All these programs used to lead to different types of Diploma di Maturità (Maturità Classica, Scientifica, Linguistica, Artistica, Magistrale, Tecnica, etc). A Maturità was the minimum admission requirement to university studies, as well as to most programmes at non-university institutions of higher education. Since 1998-1999 the school leaving qualification is the Diploma di Esame di Stato conclusivo del corso di ..The options are the same as those listed for the Maturità.

Grading Remarks

Baccalauréat indicates a level of learning roughly equivalent to one or two years of university study in the United States.

Country Notes

Literacy levels hover around 50% as education stumbles under the burden of Ivory Coast's ongoing civil war and its aftershocks. What follows is a description of a system that once was. The education system comprises of 3 stages, namely primary, secondary and tertiary education, with the rural poor falling away as years passed. The intention is that children enter the former at age 7, and remain there for 6 years, while they learn the basics of the same subjects that children learn everywhere. The secondary school model is a 2-tier one. After the first 4 of 7 years, examinations are held for the certificate of the lower cycle of secondary study, or *brevet d'étude du premier cycle*. With this in hand, students could go out to work, move on to a collège or lycée, or enter a teacher-training institution. Those who remain on at secondary school for the balance of the period are entitled to apply to study at a university, if either of such exist. Literacy levels hover around 50% as education stumbles under the burden of Ivory Coast's ongoing civil war and its aftershocks. What follows is a description of a system that once was.

Country Notes

The 6 years of primary school education in Jamaica is compulsory and free. Children receive their instruction in English, and remain there between the ages of 6 and 12. Schools may be state-owned, or private *preparatory* schools. Schools are either single-sex or mixed. Many still favor the British grammar school model. When students leave secondary school their education ceases to be free.

Grading Remarks

Country Notes

Primary education lasts for six years and leads to a Leaving Certificate which gives access to lower secondary education. Secondary education (national and private) includes: Lower secondary education, three years, and upper secondary education, three years. Entrance to public lower secondary schools is by allocation of the local education board, but entrance to private or national schools is by examination. A number of private schools offer six years of continuous education, covering the lower secondary and higher secondary cycles. This six-year "all through" secondary education is to become the standard. In the second and third year of lower secondary schools, attendance at JUKU (private examination preparation schools) is common. There are three types of upper secondary school courses: full-time, part-time and correspondence all leading to the Kotogakko Sotsugyo Shomeisho (Upper Secondary School Leaving Certificate). They offer general, academic and vocational streams and, since 1988, a "credit-system" type of upper secondary schools. Entrance to upper secondary schools is by examination or selection. Vocational secondary schools offer courses in Engineering, Agriculture and Commerce also leading to the Upper Secondary School Leaving Certificate.

Country Notes

Basic education lasts for ten years. Secondary education is free but not compulsory. It consists of two years of study for students ages 16 to 18 who have completed the basic cycle (10 years) and comprises two major tracks: 1) Secondary education, which can either be academic or vocational. At the end of the two-year period, students sit for the general secondary examination (Tawjihi) in the appropriate branch and those who pass are awarded the Tawjihi (General Secondary Education Certificate). The academic stream qualifies students for entrance to universities or the job market, provided they pass the two additional subjects. 2) Vocational secondary education, which provides intensive vocational training and apprenticeship, and leads to the award of a certificate (not a Tawjihi). This type of education is provided by the Vocational Training Corporation, under the control of the Ministry of Labor/Technical and Vocational Education and Training Higher Council.

Country Notes

A new system of education, known as the 8-4-4 system, was introduced in 1985. Under this system, eight years of primary schooling (leading to the Kenya Certificate of Primary Education) are followed by four years of secondary schooling (leading to the Kenya Certificate of Secondary Education (KCSE)) and four years of first degree studies at university. This scheme replaces one which was based on the English pattern culminating in A levels and a three-year first degree course. The introduction of the 8-4-4 education system has led to tremendous changes in the secondary school curriculum. This is in line with the need for a broad-based curriculum that prepares students for self-reliance, vocational training and further education. In 1990, the first KCSE students entered university to begin four years of study for a general degree. The KCSE is administered by the Kenya National Examinations Council.

Country Notes

Korea has a 6-3-3 system. Primary education lasts for six years. Elementary education is free and compulsory. Once children enter elementary school, they automatically advance to the next year grade each year. The elementary school curriculum is set nationally, but has been subjected to frequent changes.

Middle school lasts for three years. On successful completion of the course students receive a Diploma. Schooling years for High school is three years. It is not compulsory and is provided in three different types of high schools: academic (general); vocational; and special purpose high schools. In academic high schools, during the final two years, students may choose to specialize in Humanities or Sciences. Studies are organized according to the credit system (204-216 units for graduation). Vocational high schools are divided into several categories, offering students at least 82 units (around 40 per cent is required for graduation) of specialized subjects, as well as general academic subjects, which should occupy another 40 per cent of the whole curriculum.

Country Notes

Primary education lasts for four years. Secondary education is not compulsory. It consists in a four-year cycle comprising grades nine through twelve. For grades nine and ten, students follow a common curriculum. For grades eleven and twelve, they may choose Science or Arts specialization. Religious and Special Education secondary specialization are also offered. The Ministry of Education supervises all aspects of secondary education, both public and private, for general and Islamic education.

Grading Remarks

Country Notes

Primary education lasts for three or four years and is compulsory. Secondary education is divided into five years of basic secondary (Grades V-IX) and two years of complete secondary (Grades X-XI) which lead to the award of the Attestat o Srednem Obrazovanii giving access to higher education. At the end of basic secondary education, students sit the State examinations in five subjects. There is an entrance examination to enter universities. Professional schools (technical and boarding schools) admit students with the certificate of basic secondary and complete general secondary education. Training of qualified workers is offered in more than 210 trades. The duration of courses is three years for basic secondary school graduates and one year and a half for students with complete secondary education. Vocational secondary training is for students who want to obtain a specific specialization. The system includes teacher training establishments, medical colleges and technikums and its main task is the preparation of mid-level specialists.

Grading Remarks

Country Notes

Education at Elementary, Intermediate and Secondary school is provided free of cost by the government. Secondary education lasts for three years and is divided into general education (humanities, economics, life sciences, science) or technical education (in approximately 55 different fields of study) following six years of primary and three years of intermediate education. Selection of the track is decided by school principals on the basis of students' aptitude as shown by the Brevet examination results. Upon completion of the three-year cycle, students sit for the official Lebanese Baccalaureate exams in their respective tracks (four in all). Successful students obtain the Lebanese Baccalaureate Certificate of Secondary Education (Shahaadat Al-Bakaalouriya al Lubnaaniya l'il-ta 'liim al-Thaanawi) or the Technical Baccalaureate (Al-Bakaalouriya al-Fanniya)

Grading Remarks

Country Notes

Elementary education lasts for six years. Secondary education consists of two three-year cycles: three years of Junior secondary (Grades VII-IX) and three years of Senior secondary education (Grades X-XII). At the end of Grade IX, students sit for an examination administered by the West African Examination Council (WAEC). Successful students are eligible to enter Senior High School. Upper secondary education culminates in the WAEC Certificate Examination, which is the basis for access to higher education institutions. An entrance examination is required for access to higher education.

Country Notes

The IB schools have a 2-year curriculum and English as their language of instruction. General secondary education can also be acquired at youth and vocational schools of appropriate level. Youth schools provide lower secondary education to 12- to 16- year-old pupils who have trouble in adapting to society, learning problems or those who have interrupted their studies. Adults can acquire general secondary education at adult general education schools (mokymo centras) and in special classes at general education schools (klase). The Lithuanian education system is still undergoing its reform, which is planned to end in 2010. Its main aim is to network the different types of educational establishment and to give the opportunity to change direction of studies or re-start studying at any moment.

Country Notes

Elementary education lasts for eight years leading to the Certificate for Completed Elementary Education. Secondary school education is provided by high schools, technical and other vocational schools, and art secondary schools. In the second half of the fourth year, pupils must write a project (Maturaska Tema) and defend it and pass a written examination in their mother tongue and literature and an oral examination in a given subject of the curriculum. The technical and other vocational schools train for technical and other professions. The final examination in vocational education (four-year and three-year courses) consists in the elaboration of a theme or practical examination and a written examination in the mother tongue and literature. The Certificates of the technical schools give access to the entrance examinations at the relevant faculties and colleges. The certificate of vocational schools gives access to the entrance examinations at the relevant faculties and colleges after passing the different examinations. The Schools of Arts/Music/Ballet offer a four-year course. Students enter these schools by taking an entrance examination. At the end of their studies, they take a final examination and can enroll in universities. The International Baccalaureate gives access to the entrance examinations to all faculties and colleges.

Primary education lasts for six years. There are different types of secondary education schools: junior lyceums, area secondary schools, schools for very low achievers, church and independent (private) schools. Studies last for five years and are divided into a two-year orientation cycle and a three-year cycle of specialization in lyceum and three-year orientation and two-year specialization in area secondary schools. Admission to state junior lyceums and some church schools is through an entrance examination. At the end of this cycle, pupils sit for the Secondary Education Certificate. Higher secondary schools (sixth forms) prepare pupils for the Matriculation Certificate, which gives access to university.

Country Notes

Education is compulsory from 6 to 15 years of age. The third year of pre-school education (age 5) is planned to become compulsory. Primary education lasts for six years leading to the Certificado de Primaria. Secondary education is divided into: general secondary, secondary education for workers, tele-secondary education, and technical secondary and open education. Secondary education lasts for three years from ages 13 to 15 and is offered to pupils who have completed primary education. Secondary education for workers is offered to pupils of 15 and more who have completed primary education. Secondary education lasts for three years and leads to the Bachillerato general or the Bachillerato tecnológico.

Country Notes

Basic (fundamental) education is compulsory and lasts for nine years. It is divided into two cycles of six and three years respectively. After basic education, students enter either general secondary education or technical education and study for three years. General secondary education offers three options: letters, sciences, or mathematics leading to a Baccalauréat. Technical education leads to the Baccalauréat Technique. Some technical schools offer two years of training after the Baccalauréat leading to the Brevet de Technicien Supérieur (BTS) (for students ages 18 – 20). Access to vocational education at the basic education level (crafts and agriculture) is open to pupils in Forms 7 or 8 following a competitive examination. Pupils in Form 9 or in the first two years of secondary education may also opt for vocational training after passing a competitive examination. They are awarded a Certificate de Qualification Professionnelle at the end.

Country Notes

Primary education, the first stage of basic education is, in principle, compulsory. It lasts for five years. Secondary education is divided into middle schools and high schools. *Technical secondary education is provided by the State Technical High School which prepares students for admission to the government technical institutes, for employment in industry and admission to study Engineering at higher education level. Several trade schools provide two-year training for middle school leavers. Agricultural schools provide training at middle or high school level.

Country Notes

*The Nepali calendar does include twelve months, but they are based directly on the cycle of the moon. The month of Baisakh starts on the new moon in the middle of what we call April and is the beginning of the Nepali year. It is fitting, therefore, that the school year begins at this time as well. It is also important to consider that the Nepali calendar is on a different year, 57 years ahead of ours.

Students enrolled in Tribhuvan University sit for the Proficiency Certificate, those enrolled in Kathmandu University sit for the intermediate examinations and those enrolled in Mahendra Sanskrit University sit for the Uttar Madhyama examinations. Technical education may start after Grade 5 when pupils can study at Basic Technical Schools for three years to obtain a Training Level Certificate. Then they can follow a four- year course at Middle-Level Technical Schools at the end of which they obtain the Craftsman Certificate. Technical education is also available after Grade 10. Pupils holding the School Leaving Certificate can enter higher technical schools where two years' training leads to the Technical School Leaving Certificate and three years' training in electricity, mechanics and plumbing to the Technician Certificate. Higher secondary education has recently been introduced as an upward extension of secondary education and will be implemented in a phased manner. This will lead to the phasing out of the Proficiency Certificate level courses at university level, shifting the responsibility to the Higher Secondary Education Board. Tribhuvan University has already initiated the process of phasing out this level to higher secondary education.

Country Notes

Primary education lasts for eight years. Secondary education consists of VMBO (preparatory secondary vocational education), HAVO (senior general education) and VWO (pre-university education). Those with a VMBO Diploma can then go on to the MBO. Depending on interest and capability, pupils in VMBO can choose from one of four learning tracks or routes: 1) the theoretical route granting admission to long MBO or HAVO; 2) the vocationally-oriented route granting admission to long training in secondary vocational education (MBO) or to short training programs; 3) a mixed educational route with a combination of general subjects and vocationally-oriented subjects; and 4) a vocational route, oriented towards the labor market and aimed at a specific group for which VMBO is the last educational stage

Primary education lasts for eight years. Children are permitted to enter school at 5 but must be enrolled by 6. Secondary education lasts for five years (from years 9 to 13). Entrance to secondary schools is non-selective. The basis of the school programme is the New Zealand Curriculum in the essential learning areas of Languages, Mathematics, Science, Technology, Social Sciences, the Arts, Health and Physical Wellbeing. The curriculum emphasizes the development of Communication, Numeracy, Information, Problem Solving, Self-Management and Competitive, Social and Co-operative, Physical, and Work and Study Skills. Diagnostic and formative assessment assists students to achieve the objectives set out in the national curriculum statements and published syllabuses. All national school qualifications are administered by the New Zealand Qualifications Authority. Secondary schools also offer Unit Standard Credits between Levels 1-4 of the National Qualifications Framework (National Certificate Level).

Grading Remarks

For the West African Senior School Certificate: 1-9
 Highest on scale: A 1
 Pass/fail level: P 8
 Lowest on scale: F 9

Country Notes

Primary education lasts for six years. Entrance to secondary education is based on an examination. Secondary education is divided into junior and senior secondary, and technical and vocational education. The Junior School Certificate is awarded after three years of junior school. The Senior School Certificate is awarded after three years of senior secondary education. It replaced the West African GCE "O" level in 1989. Pupils who complete junior secondary school are streamed into senior secondary school, technical college, out of school vocation training center or an apprenticeship. Technical secondary education is offered in secondary commercial schools which offer six-year courses including academic subjects and specialization. At the end of the course, students may take the examinations for the Senior School Certificate. Vocational education produces low level manpower and is offered in technical colleges or business and engineering skills training centres. Technical colleges are the only alternative to senior secondary schools as a route to further formal education and training after junior secondary education. To enter university, students have to pass the University Matriculation examination (UME).

In addition to the regular educational system, there exists Folk High Schools to provide students with personal growth and development rather than academic. These are associated with the Scandinavian tradition of public enlightenment.

Country Notes

As from 1997, Norwegian children start school during the calendar year in which they reach the age of 6. Compulsory education covers 10 years and consists of three stages: primary stage grades 1-4 (age 6-10); intermediate stage grades 5-7 (ages 10-13) and lower secondary stage grades 8-10 (age 13-16). Upper secondary education lasts for three years. It consists of either general or vocational studies. General studies comprise the Foundation Course (first year), Advanced Course I (second year) and Advanced Course II (third year) leading to the Certificate of Upper Secondary Education. Vocational studies comprise the Foundation Course (first year), Advanced Course I (second year) and either Advanced Course II (third year) or Practical training/Apprenticeship (1-2 years) or a Trade skill test leading to a Certificate. The final examination (trade or journeyman's examination) is the same, regardless of whether training took place at school or in the workplace. Pupils in vocational courses are to be given the opportunity to obtain the additional qualifications required for higher studies by studying for one extra year. Country Notes

Primary education lasts for five years. Secondary education is divided into three cycles: three years' middle school, two years' secondary and two years' higher secondary. On completion of the second cycle, pupils take the Secondary School Certificate. Pupils may then study for a further two years or *three years in the case of technical education, specializing in Science, Arts or in technical and vocational studies. At the end of this period, pupils take the examinations for the Intermediate Certificate/Higher Secondary School Certificate/Diploma of Associate Engineering. Vocational secondary courses lead to the Higher Secondary School Certificate or a Diploma in technical/vocational subjects.

Basic education (Educación Escolar Básica) is free and compulsory and lasts for nine years, divided into three cycles of three years each. Secondary education lasts for three years and is divided into general and professional studies. In addition to the secondary leaving diploma, an entrance examination is necessary to enter universities.

Primary education lasts for six years and is compulsory. A year of pre-primary education is also compulsory. Secondary education covers five years divided into two cycles and, according to the constitution, is also compulsory. The first cycle covers two years of general studies and the second three years of specialization. In the second cycle, pupils choose between academic and technical branches. In the academic branch, pupils choose between Arts and Science. On successful completion of the second cycle, pupils obtain a certificado with the specialization they have followed. In the technical branch, the qualification received is the Diploma de Aptitud Profesional. Although pupils may take the university entrance examinations directly after secondary school, most follow a one-year course of study (curso preparatorio). The system of secondary education is currently being revised.

Country Notes

Primary education lasts for four years and intermediate education generally lasts for two years. They constitute six years of elementary education (Grades 1 to 6). Pre-school education (nursery, kindergarten, preparatory and others) and 7th grade are optional. Secondary education usually lasts for four years. Compulsory subjects include English, Filipino, Science, Social Studies, Mathematics, Practical Arts, Youth Development Training and Citizens Army training. The cycle culminates in the examinations for the High School Diploma. The National Secondary Aptitude Test is taken at this time.

the marks "+" and "-" are often added	to the principal grade.	

Grading Remarks

After the 1999 reform, 6-year primary schools and 3-year gymnasja were introduced. Secondary education is provided in 3-year general lyceums (liceum ogólnokształcące) or in vocational secondary schools such as the 3-year liceum profilowane (specialized lyceum) and 4-year technikum (secondary technical school). In addition, there are 2-3-year basic vocational schools (zasadnicza szkoła zawodowa) whose graduates obtain the świadectwo ukończenia zasadniczej szkoły zawodowej (Certificate of Completion of Education in the Basic Vocational School).

Country Notes

The secondary school credentials of the former system will be issued until 2005. In the transition period, both the former and the new types of secondary school will co-exist. The credential that gives right to access higher education before and after the reform is the świadectwo dojrzałości issued after completion of education in a secondary school and passing the Maturity examination (egzamin dojrzałości/matura). The only type of post-primary school that does not give access to higher education is the basic vocational school, both in the old and new system. The graduates of these schools may continue their education in different types of complementary secondary schools: liceum uzupełniające (complementary lyceum) or technikum uzupełniające (complementary technical secondary school). Following completion of education in these schools they can pass the maturity examination and obtain a Maturity Certificate and thus become eligible for entrance to higher education

Basic education lasts for nine years divided into three stages of four, two and three years respectively. A Diploma/Certificate is awarded at the end of the third stage. Secondary education - public, private and cooperative - is optional and consists of a three-year cycle after having completed the third cycle of basic education. Access is through the Certificate of Basic Education. There are two types of courses: general courses and technical/vocational courses, providing instruction in technical, technological, professional fields and in the Portuguese language and culture. Permeability between the courses is guaranteed. The teaching and practice of technical, technological or artistic courses are provided by vocational schools and special schools for education in Arts. Courses are sanctioned by the Certificado de Habilitações do Ensino Secundário/Diploma de Ensino Secundário, which is one of the conditions for access to higher education. In order to develop personal and professional competencies, legislation has been passed to approve the stimulation of post-secondary-level technological specialized courses (CET). These courses qualify for the exercise of a profession (Nível IV) and enable people to pursue studies at higher education level.

Grading Remarks

Passing is considered to be 3, 4, or 5. Failing is considered to be 1 or 2.

At some schools, a scale of 0 - 10 or 0 - 100 is used for examinations.

Country Notes

The Ministry of Education and Science of Georgia is responsible for the provision of education in Georgia. Education is compulsory in the Republic of Georgia from Primary school until the first stage of Secondary school (Basic). The academic year is broken into three trimesters. The academic year is approximately 180 days. Vacations are three times a year, Winter, Easter and Summer holidays. After Basic School is completed, students can choose to go to Secondary School or Special Education. In all phases of school, six main subjects are taught: Georgian language and literature, mathematics, natural sciences (biology, chemistry, physics, and physical geography), Georgian history and geography, foreign language (French, English, Russian, German), and Aesthetic, labour, and physical training. In Secondary School, students are required to take Georgian language and literature, Georgian history, and mathematics. They can choose to specialize in subjects from natural sciences, social sciences or aesthetic-labour sciences. Those who graduate from Special Education receive a Sashulo Profesiuli Sastsavleblis Diplomi. This is considered vocational secondary education, not higher education.

Grading Remarks

* Successful students receive a **Certificat/Diplomá de Absolvire a Gimnaziulu*** (Certificate/Diplomá of Graduation) or a **Certificat de Absolvire a Invatamintului de 8 Ani** (Certificate of Graduation from 8 Year Education). Students are then entitled to apply for entrance into upper secondary school or vocational school.

Country Notes

Primary education lasts for four years. Secondary education consists in: 1) lower secondary school education organized in Gimnaziu for grades 5 to 8 and Ciclul inferior al liceului (lower cycle of highschool) or Arts and trades schools (vocational) for grades 9 and 10. 2) upper secondary school education organized in Ciclul superior al liceului for grades 11, 12 and 13 followed, if necessary, by an additional high school year for those who want to move from vocational training (grade 10) to upper secondary school education. High school education (lower cycle of high school and upper secondary school education) offers three different orientations (academic, technological, specialization).

Grading Remarks

Primary education covers seven years from age five to twelve years (11+), Kindergarten to Grade Six. At the end of this stage, the student progresses to a selected high school in accordance with a comprehensive system of education. Primary schools are zoned and serve as feeder schools to a particular secondary school. Placement in First Form is based on a performance in primary school and performance on a Test of Standards.

Country Notes

The secondary education school system covers seven years in two stages for periods of five and two years respectively. There is now only one school of this type - the Charlestown Secondary School in Nevis - in which there is the traditional Sixth Form. In St. Kitts, students who complete secondary school go on to the Clarence Fitzroy Bryant College entering either the Division of Arts, Science and General Studies, or the Division of Technical and Vocational Education. School leavers can also enter the Division of Health Sciences (to pursue a course in Nursing) or the Division of Teacher Education, for pre-service training. Students who do not have the qualifications to enter the CFBC can opt to attend the Advanced Vocational Education Centre (AVEC). On conclusion of the first phase, students may take the CSEC examinations. At the end of year 4, students are assessed for the National Certificate of Educational Competencies (NCEC) which is a competency-based system. After two years of Senior High School, they may take *CAPE or GCE 'A' Level examinations. CXC now offers combinations/clusters of CAPE courses as Associate Degrees. The first students registering for such Associate Degrees will be assessed in June 2006.

Grading Remarks

Elementary education lasts for six years and leads to the General Elementary Education Certificate. Secondary school education lasts for three years following upon three years of intermediate education. Pupils can choose between general secondary and technical schools. In the first year of general secondary school, pupils share a common curriculum. At the end of this year, they are divided into the scientific and literary tracks for the final two years.

Country Notes

Students obtaining a score of 60% in all the first year subjects may choose between the literary and scientific track. Students obtaining a score less than 60% must opt for the literary track. The course culminates in the Tawjihiyah. Technical education includes industrial, commercial and agricultural schools. An Intermediate School Certificate is required for admission. Courses lead to the Secondary Industrial School Diploma, the Secondary Commercial School Diploma and the Secondary Agricultural School Diploma. There are also Technical Assistant Institutes which offer two-year vocational courses in Architectural Drawing, Construction Supervision, Health Supervision, Road Supervision, Surveying and Water Supervision leading to the Certificate of the Technical Assistant Institute. Health Institutes and Nursing Schools offer three-year courses leading to the Health Institute Diploma or the Certificate of Technical Nursing. Male and female education is completely segregated.

.Primary education lasts for six years, divided into junior primary and senior primary. Until now, secondary school lasted for five years, the first year of the junior secondary phase being followed in primary school. At the end of junior secondary (three years), pupils are awarded the General Education and Training Certificate. At the end of the senior secondary phase (lasting for three years), pupils sit for the Senior

Country Notes

The 1996 Constitution confirms the right to basic education and that the Government must progressively make further education (i.e. the senior secondary phase preceding higher education) available and accessible through reasonable measures. Compulsory education lasts for nine years (until age 15), followed by non-compulsory further education. In the senior cycle, students may study subjects either at Higher Grade, Standard Grade, or Lower Grade. N-courses are also offered to some technical school and college candidates. A Senior Certificate is awarded by the SA Certification Council following externally moderated examinations on completion of senior secondary school. Technical secondary education is provided by technical centres and secondary and vocational schools. Matriculation endorsements are also offered by this Council to students who have satisfied the ministerially approved overlay on the Senior Certificate. Provision is also made for further education colleges through the Further Education and Training Act. Technical high schools may, inter alia, offer courses leading to Senior Certificates with matriculation endorsements, which statutorily constitute the minimum general admission requirement for access to universities. Universities of Technology (former Technikons) require Senior Certificates but not necessarily with matriculation endorsements.

Grading Remarks**Country Notes**

In Slovenia, primary and lower secondary education are unified and last for 8 years. A new system is being gradually implemented whereby this level will last for 9 years (3 three-year cycles). There are three types of secondary schools with: a) vocational education programmes (lasting for two-and-a-half or three years, the latter offering the possibility to continue in a two-year upgrade programme or lead directly to the labour market); b) technical education programmes (four-year programmes in different areas); and c) general education programmes (classical gimnazija, technical gimnazija, economic gimnazija, art gimnazija and programmes leading to the International Baccalaureate). In the two bilingual regions, primary and secondary education for the Italian and Hungarian ethnic minorities are offered in Italian, Hungarian and Slovenian.

Grading Remarks**Country Notes**

Primary education lasts for six years. Following the 1990 reform, compulsory secondary education (ESO) lasts for four years (from 12 to 16) divided into two two-year cycles (from 12 to 14 and from 14 to 16). It leads to the Graduado en Educación Secundaria Obligatoria Certificate. This certificate is required for a) Bachillerato studies (16 to 18) and b) intermediate vocational training (Ciclos Formativos de Grado Medio). Bachillerato students who have completed all subjects successfully are awarded the Título de Bachillerato (before the 1990 reform, students also had to complete the Curso de Orientación Universitaria). To enter university, students must sit for an entrance examination (Prueba de Acceso a la Universidad). In intermediate vocational training (Ciclos Formativos de Grado medio) students who successfully complete their training are awarded the Certificado de Técnico in the relevant field. This certificate enables them to work in areas related to their training, to pursue further training, or to study for a Bachillerato

Primary education lasts for five years. Secondary education comprises junior secondary, senior secondary and collegiate (pre-university) education. Junior secondary education lasts for three years and is compulsory up to the school-leaving age of 14. Senior secondary education lasts for three years. At the end of year XI pupils sit for the Sri Lankan GCE O-levels. They must pass in six subjects including mathematics and mother tongue Sinhalese or Tamil. The collegiate course lasts for two years. At the end of year XIII pupils sit for the Sri Lankan GCE A-level examination. As from the year 2000, students can present three subjects for the GCE A level. The minimum admission requirement is a pass in all three approved subjects with an aggregate not less than 135 points and a mark of not less than 30% for the Common General Paper. However, there are no special admission criteria for enrolment in courses conducted by the Open University of Sri Lanka.

Basic education lasts for eight years and is compulsory. It leads to the Basic Education Certificate. Academic secondary education lasts for three years leading to the Sudan Secondary School Certificate. In the first two years, students follow the same curriculum. In the final year, they choose between arts and science streams. The technical secondary schools include Industrial, Commercial, Agricultural and Women Studies. They offer three-year courses leading to the Sudan Secondary School Certificate. Admission to higher education is based on the passing of this Certificate. Vocational Training Centres offer two-year vocational courses. Admission is based on completion of basic education.

In Serbia : Primary (compulsory) education lasts for eight years, starting at 7 years old, and is divided into two cycles, each one lasting four years. Prior to these cycles, a preparatory educational period of one year is mandatory. Secondary education is provided in high schools. The certificate awarded at the end is the Diploma o Završenoj Srednjoj Školi.

Country Notes

Secondary vocational schools offer both general and vocational (practical and theoretical) education for direct entry in the world of work and further education. The vocational qualification is acquired at the level of first form and second form, then third and fourth form and specialization after secondary education lasting for one year. In Montenegro: Primary (compulsory) education is extended to nine years. It is extended downwards, children starting primary school one year earlier. More exactly, the children who by the end of the calendar year turn six shall enrol at primary schools. In the future nine-year primary education will be divided into three cycle, each one lasting three years. Secondary education: Instead of the existing High School courses (natural-science; social-language; study of philology and mathematics), a general High School is proposed, where one part of the curriculum would be devoted to a general-educational core and another to elective subjects. Schooling in High Schools lasts for four years, from the age of 15 to 18. The curricula in Serbia and Montenegro are adopted by the Ministers of Education with the prior consent of the Education Councils of both Republics.

Grading Remarks

The Swedish state school system comprises compulsory school and various types of voluntary schooling. Compulsory school includes nine years of compulsory basic school, school for the Saami people of Northern Sweden, special school and compulsory school for the mentally handicapped.

Country Notes

Post-compulsory education is offered through 17 National Programmes providing qualifications that allow students to go on to higher education. Some of these programmes also include industrial work placements. The National Programmes of upper secondary education are offered at Gymnasia and lead to the award of the Slutbetyg Från Gymnasieskola. Tuition is free. Outside the upper secondary school system there are folk high schools (Folkhögskolan) which provide state-supported adult education lasting between one and three years of studies. There are no formal examinations. Post-secondary studies include advanced vocational training (Kvalificerad yrkesutbildning) which is intended to meet the labour market's needs for the skills required for modern production of goods and services. About one-third of the course period takes place at the workplace. As from January 2002, this form of training is a permanent part of the Swedish educational system but does not belong to the higher education sector. Admission is based on three-year upper secondary education or corresponding proficiency. The training is normally intended to correspond to two years of study and leads to a Certificate of Advanced Vocational Training (Kvalificerad yrkesexamen).

Usual grading system in secondary school

Full Description: In most cantons, the 6-point scale is used: 6 = ausgezeichnet/très bien (outstanding) = A;
 5 gut/bien= B; 4 = genügend/suffisant (pass) = C; 3-2-1 = ungenügend/insuffisant (fail)
 Highest on scale: 6=ausgezeichnet/très bien (outstanding);
 Pass/fail level: 4=genügend/suffisant (pass) Lowest on scale: 1=schlecht/mauvais (fail).

Country Notes

Compulsory education lasts for nine years and consists of primary and lower secondary education (secondary I). Primary education lasts from four to six years depending on the Canton. Lower secondary education lasts from three to five years depending on the Canton. Upper secondary education (secondary II) is not compulsory and varies in length from three to four years. There are two main types of upper secondary schools: academic schools (Maturitätsschulen) and vocational schools (Berufsfachschulen). Academic upper secondary schools prepare students for entry to Universities and Teacher Training Schools; vocational secondary schools prepare students for a wide range of occupations and Higher Vocational Schools (Höhere Fachschulen) as well as Universities of Applied Sciences (if combined with the Professional Baccalaureate) .

Country Notes

Basic education stage I lasts for five years. It is followed by four years of Basic Education stage II. At the end of grade 9, pupils sit for the national Basic Education Leaving Certificate examination. Secondary education lasts for three years. Students may either enter the general or the technical branches, although entry is selective and is based on the Basic Education Leaving Certificate examination. In the general branch, the first year is introductory. After this, pupils enter either the literary or the scientific track. At the end of the three-year course, pupils sit for the *Al-Shahâda-Al Thânawiyya/Secondary School Leaving Certificate*. Technical secondary education is divided into technical industrial and commercial tracks. Vocational education comprises industrial and vocational education for girls. At the end of the course, pupils sit for the *Al-Shahâda Al-Thânawiyya Al-Fanniyya (Technical Baccalaureate)* which offers entry to the various Vocational Training Institutes.

Country Notes

The school system follows a 6-3-3 structure where six-year primary and three-year lower secondary education are compulsory. At the upper secondary level, schools are divided into 2 major tracks : general (academic), and vocational. Students in the general or academic track follow the comprehensive curriculum that includes 30 units of compulsory subjects, and at least 45 units of elective subjects plus extra-curricula activities. One instructional unit is defined as approximately two 50-minute classes per week of the 20 week semester system. At the end of upper secondary school pupils sit for the Higher Secondary School Certificate (Mathayom Suksa 6).

Grading Remarks

For the CXC Secondary Education Certificate, there is no pass/fail mark. Six grades are awarded, on a scale of 1 (maximum) - 6.

Highest on scale: 1

Lowest on scale: 6

Note: In some schools a grade of 40% or lower is failing

Country Notes

Primary education is compulsory and lasts for six years leading to the Common Entrance Examination. There are two types of secondary education: the traditional academic sector providing five or seven years of schooling (Five years of secondary school followed by two years of Sixth Form) and the new system providing three-year junior secondary and two years of senior secondary schooling and two years of Sixth Form. New-type schools offer a more diversified curriculum than the traditional schools. After five years of secondary school, courses lead to the examinations for the Caribbean Examinations Council Secondary Education Certificate or GCE O Levels, and after a further two years to GCE A level examinations or to the new Caribbean Advanced Proficiency Examination (CAPE). Technical and vocational courses are also offered in Business Studies; Engineering; Surveying; Home Economics; and Graphics and Applied Arts.

Grading Remarks

The age of entry to school is six or seven. Since 1997, secondary education follows eight years of basic education and covers general, vocational and technical high schools that provide three or four years of education. General high schools do not prepare students for a specific profession but rather for higher education. The following institutions are considered to fall within general secondary education: high schools; high schools with intensive foreign language teaching; Anatolian high schools where a foreign language - English, French or German - is taught during the preparatory year and the teaching of certain subjects is provided in that language in upper grades.

Country Notes

In general high schools, the average number of weekly periods of teaching in each grade varies from a minimum of 33 to a maximum of 41. In their second year, students in high schools where the general programme is applied may choose to attend branches which specialize in the natural sciences, literature and mathematics, the social sciences, foreign languages, art or physical education. Vocational high schools provide three-year secondary education, train qualified people for various professions and also prepare students for higher education. Technical high schools offer a four-year programme. Subjects offered in the first year are the same as in the vocational high schools. Secondary education students obtain the Lise Diplomasi which is the prerequisite for entry to higher education. Admission to university is centralized and based on the Student Selection Examination (ÖSS). As of June 2003, candidates have to obtain a minimum of 160,000 points (previously 105,000 points) to be eligible to enrol in two-year vocational higher education and open/distance education programmes and a minimum of 185,000 points (previously 120,000 points) for all four-year undergraduate programmes in the Student Selection Examination (ÖSS). 185,000 and 160,000 points respectively correspond to 120 and 105 of the previous ÖSS score types. The maximum ÖSS score will be 300 as from 2003. System of Education: http://www.unesco.org/iau/onlinebases/systems_data/tr.rtf

All children aged from 7 to 15 years' old attend nine-year compulsory school. Options after comprehensive school are upper secondary school or vocational education. Upper secondary school: 3-year general school leading to the Matriculation Examination, giving successful students access to university and other higher education schools. The present vocational education system covers both general secondary and vocational programmes, with separate tracks for comprehensive school leavers and matriculated students. The system is being reformed.

Grading Remarks

In England, Wales and Scotland go to comprehensive schools (96% in Scotland), which provide a wide range of secondary education for most children of all abilities in the 11-18 age range (12-18 in Scotland). At age 16 pupils in England and Wales may transfer to sixth-form colleges or tertiary colleges. In Northern Ireland, secondary education normally begins when pupils reach the age of 11. There are two main types of school, grammar and secondary. Grammar schools provide a range of courses for pupils between 11 and 18 years of age, while secondary schools provide a similar range of courses for the 11-16 age group, although some secondary schools offer opportunities for those aged 16+.

In England

Country Notes

Wales and Northern Ireland, the General Certificate of Secondary Education (GCSE) serves as the principal examination taken by secondary school pupils at 16+. GCE A-level examinations are normally taken following the GCSE and after two further years of study, usually in Form VI of secondary schools, tertiary colleges or colleges of further education. The National Qualifications Framework (NQF) sets out the levels (currently eight) at which qualifications are recognized: GCSEs Grades D-G are at level 1, GCSEs Grades A*-C at level 2, and A-levels at level 3. In Scotland, at the end of four years of lower secondary education students are eligible to sit their first National Qualifications examinations, either Standard Grade or the newer Intermediate levels 1 and 2 of the National Qualifications (General and Credit Standard Grade, respectively). Their achievements are recorded on the Scottish Qualifications Certificate (SQC, formerly the Scottish Certificate of Education). The Higher level of SQC, usually taken in the fifth year of (upper) secondary education at about age 17, is the target of many students who aim to enter professions or to go on to higher education. The Certificate of Sixth-Year Studies was available for students with a pass at Higher level in their fifth year and continuing their studies for another year; it has been replaced by the Advanced Higher level.

8-9	B
6-7	C
5	D
0-4	F

Grading Remarks**Country Notes**

Primary education lasts for six years and, together with the basic cycle of secondary education (first three years) form the nine years of compulsory education. The last three years of secondary education are called the "Ciclo Diversificado" where students can opt for Bachillerato courses or technical-vocational education. The Bachillerato offer three basic options: Biology, Humanities and Science which are again subdivided during the last year. Technical studies are offered in technical schools and lasts between two and seven years. One example is the "Universidad del Trabajo" where students complete three or four-year programmes, depending on the field chosen, and leave with the "Bachillerato Técnico".

Grading Scale**U.S. EQUIVALENT**

5	Excellent	A
4	Good	B
3	Satisfactory	C
2	Unsatisfactory	D
1	Unsatisfactory	F

Grading Remarks

Passing in a grade of 3 or higher. Grades of 1 or 2 are rarely shown on transcripts. A pass mark is issued when an exam was not taken but all course requisites were met. This can be equated to a CR (credit)/Pass in the U.S. system.

Country Notes

General (basic) education is provided in several types of basic education schools: schools with only primary education (Grades I-IV); schools which offer partial (Grades I-IX) and complete (Grades I-XI) secondary education; adult education centres, and specialized schools and boarding schools for students with disabilities. General education is also available in new types of institutions (gymnasia and lyceums), some of them attached to higher education institutions. General basic education is followed by two or three years of upper secondary education (leading to the Certificate of Completed Secondary Education) or vocational and technical (VTE) education. This is provided at two levels: the first level offers six months to three years of basic vocational training after Grade IX; the second level generally offers at least two years of training (post-secondary) in over 300 specializations leading to the Diploma of Specialized Secondary Education. A network of specialized secondary vocational institutions was formed in 1997/98. Literacy is practically universal for both men and women (99%). However, considering that the government is implementing a long-term programme of transition from Cyrillic to Latin script, in the short-term there could be some changes in the literacy rate.

10-13	Bueno	C
1-9	Aplazado	F

Grading Remarks

Is on scale of 20-0, with 10 as the minimum pass mark. Each academic year is divided into 3 or more periods. A grade is given for each period. At the end of the year the grades for each period are averaged to form a previous grade (60% of the final mark).

Country Notes

Pre-school education is the first compulsory stage of education. Basic education is the second and lasts for nine years, divided into three cycles and leading to the Certificado de Educación Básica. Secondary education (educación media) is divided into two options: *1. Diversified, to train "bachilleres" in Science, Art and/or Humanities (two years). **2. Professional, to train middle technicians "Técnicos medios" (three years). Studies are divided into industrial, agricultural, commercial and administrative, and health sectors.

Students are then eligible to take the university entrance examination.**Country Notes**

Primary education lasts for five years (Grades 1-V) leading to the Certificate of Primary Education. Secondary school education is divided into two cycles: basic secondary (Grades VI-IX) and specialized secondary school (Grades X-XII). Admission to upper secondary school requires the success in a competitive entrance examination. There is also technical and vocational secondary education. Secondary technical schools provide students with an intermediate level of technical skills. Students are enrolled in vocational training schools at two levels: at the lower level, the duration of courses ranges from two years (simple trades) to three years. At the upper secondary level, one- or two-year courses are offered. Upon graduation, students obtain a diploma. At the end of secondary education, pupils sit for the *Bang Tot Nghiep Pho Thong Trung Hoc* (universal graduation) examination administered by the MOET. They then have to pass an entrance examination called *Ky Thi TuyEen Vởo Dai Hoc* to enter university.

Grading Remarks**Usual grading system in secondary school**

Full Description: Al Thanawiya is graded out of 700.
 Highest on scale: 630-700 excellent, 561-630 very good
 491-560 good, 421-490 fair
 Lowest on scale: 350-420 pass

Country Notes

Basic education covers nine years leading to the Intermediate School Certificate. Secondary education covers three years. After a common first-year curriculum, students choose either the scientific or literary track for the remaining two years. The Al Thanawiya examination is taken at the end of the third year. There are some technical secondary schools, three vocational training centres, a Veterinary Training School, a Health Manpower Training Institute and several agricultural secondary schools. There are also religious institutes which concentrate on Islamic education. Vocational secondary education also leads to the Al Thanawiya after three years or to vocational certificates. The education system is based on Islamic Law.

Full Description: A-F for Ordinary ("O") Level and Advanced ("A") Level.

Highest on scale: A

Pass/fail level: E for "A" Level and D for "O" Level.

Lowest on scale: F

Country Notes

Primary education lasts seven years and children usually enroll at the age of 6. The seven-year cycle is divided into infant grades (I and II) and junior grades (III-VII). At the end of the primary stage, successful pupils are awarded the Grade Seven Certificate. Secondary education lasts six years and includes: a four-year Ordinary Level cycle where the official entry age is 13 years (there is unimpeded progress to the CGE O-Level cycle, but some schools set selection criteria based on Grade VII examinations); a two-year Advanced Level cycle, which is a restricted cycle since progression is on merit or selection. At the end, students take the Cambridge Higher School Certificate (HSC) or CGE 'A' Level Certificate. Important to note that secondary schools do not produce transcripts for their students. Students receive informal, handwritten school reports twice a year. Teachers sometimes downgrade students reports as motivator for them to work harder. The "O" and "A" level certificates are considered the official academic qualifications. The exam results are certified and stamped by the Head master, the Minister of Education or the U.S. Embassy in Zimbabwe.
