

## In Your Head

It all starts in your head. You have something in your head that's different from how it is in the real world. Maybe you want to change something in the world to be more like this idea in your head. Or maybe there's nothing like this idea in your head, and you want to make it just as real as everything else. You want your idea to be something you can see, touch, and explore.	11 23 34 45 60 71 75
How do you get what's in your head out into the world? How do you make things different, or make something that wasn't there before? The difference between what's in your head and what's out in the world is called a problem. When you figure out how to get what's in your head into the world, what you end up with is called a solution.	87 97 106 117 129 140
