

Understand congruence and similarity using physical models, transparencies, or geometry software (8.G.1-5)	
<b>Standard 8.G.1:</b> Verify experimentally the properties of rotations, reflections, and translations: <ol style="list-style-type: none"><li>Lines are taken to lines, and line segments to line segments of the same length.</li><li>Angles are taken to angles of the same measure.</li><li>Parallel lines are taken to parallel lines.</li></ol>	
Concepts and Skills to Master (This is student's first exposure to transformations in the Utah Core) <ul style="list-style-type: none"><li>Basic understanding of rotation (about a point), reflection (about a line), and translation (in a given direction).</li><li>Verify that congruence of line segments and angles is maintained through rotation, reflection, and translation.</li><li>Verify that lines remain lines through rotation, reflection, and translation.</li><li>Verify that when parallel lines are rotated, reflected, or translated, each in the same way, they remain parallel lines.</li></ul>	
Related Standards: Current Course	Related Standards: Future Courses
<a href="#">8.G.2</a> , <a href="#">8.G.3</a> , <a href="#">8.G.4</a> , <a href="#">8.G.5</a>	All congruence standards, including: <a href="#">I.G.CO.1</a> , <a href="#">I.G.CO.2</a> , <a href="#">I.G.CO.3</a> , <a href="#">I.G.CO.4</a> , <a href="#">I.G.CO.5</a> , <a href="#">I.G.CO.6</a> , <a href="#">I.G.CO.7</a> , <a href="#">I.G.CO.8</a> , <a href="#">I.G.CO.12</a> , <a href="#">I.G.CO.13</a> , <a href="#">II.G.CO.9</a> , <a href="#">II.G.CO.10</a> , <a href="#">II.G.CO.11</a>

## Support for Teachers

Critical Background Knowledge (Access Background Knowledge)
<ul style="list-style-type: none"><li>Draw angles, segments, lines, and parallel lines (<a href="#">4.G.1</a>) and measure angles using a protractor (<a href="#">4.MD.6</a>)</li><li>Classify two dimensional figures based on parallel lines (<a href="#">4.G.2</a>)</li><li>Draw geometric shapes (<a href="#">7.G.2</a>)</li></ul>
Academic Vocabulary
Transformation, rotation, reflection, translation, angle of rotation, center of rotation, line of reflection, image, pre-image, angle, segment, parallel line

Understand congruence and similarity using physical models, transparencies, or geometry software (8.G.1-5)	
<b>Standard 8.G.2:</b> Understand that a two-dimensional figure is congruent to another if the second can be obtained from the first by a sequence of rotations, reflections, and translations; given two congruent figures, describe a sequence that exhibits the congruence between them.	
Concepts and Skills to Master (This is student's first exposure to congruence in the Utah Core)	
<ul style="list-style-type: none"><li>Understand that the congruency of two dimensional figures is maintained while undergoing rigid transformations.</li><li>Describe the transformation of a figure as a rotation, reflection, translation or a combination of transformations.</li><li>Understand congruence via transformations using physical models, transparencies, or geometry software.</li></ul>	
Related Standards: Current Course	Related Standards: Future Courses
<a href="#">8.G.1</a> , <a href="#">8.G.3</a> , <a href="#">8.G.4</a>	All congruence standards, including: <a href="#">I.G.CO.1</a> , <a href="#">I.G.CO.2</a> , <a href="#">I.G.CO.3</a> , <a href="#">I.G.CO.4</a> , <a href="#">I.G.CO.5</a> , <a href="#">I.G.CO.6</a> , <a href="#">I.G.CO.7</a> , <a href="#">I.G.CO.8</a> , <a href="#">I.G.CO.12</a> , <a href="#">I.G.CO.13</a> , <a href="#">II.G.CO.9</a> , <a href="#">II.G.CO.10</a> , <a href="#">II.G.CO.11</a>

## Support for Teachers

Critical Background Knowledge (Access Background Knowledge)
<ul style="list-style-type: none"><li>Verify experimentally the properties of rotations, reflections, and translations (<a href="#">8.G.1</a>)</li><li>Draw geometric shapes (<a href="#">7.G.2</a>)</li></ul>
Academic Vocabulary
Congruent, rotation, reflection, translation, rigid motion, center of rotation, line of reflection, angle of rotation, image, pre-image
Resources
<a href="#">Curriculum Resources</a> : <a href="http://www.uen.org/core/core.do?courseNum=5180#71440">http://www.uen.org/core/core.do?courseNum=5180#71440</a>

Understand congruence and similarity using physical models, transparencies, or geometry software (8.G.1-5)	
<b>Standard 8.G.3:</b> Observe that orientation of the plane is preserved in rotations and translations, but not with reflections. Describe the effect of dilations, translations, rotations, and reflections on two-dimensional figures using coordinates.	
Concepts and Skills to Master	
<ul style="list-style-type: none"><li>Observe that orientation of the plane is preserved in rotations and translations, but not with reflections.</li><li>Understand characteristics of dilations, translations, rotations, and reflections of two-dimensional figures on the coordinate plane (describing transformations as functions takes place in Secondary Mathematics I).</li><li>Effects of transformations might include: size/shape does not change in translations, reflections and rotations; orientation changes with reflections.</li></ul>	
Related Standards: Current Course	Related Standards: Future Courses

## Support for Teachers

Critical Background Knowledge (Access Background Knowledge)
<ul style="list-style-type: none"><li>Verify experimentally the properties of rotations, translations, reflections, and dilations (<a href="#">8.G.1</a>)</li><li>Understand congruence using rotations, reflections, and translations (<a href="#">8.G.2</a>)</li><li>Describe effect of dilations, rotations, reflections, and translations (<a href="#">8.G.3</a>)</li><li>Understand proportions (<a href="#">7.RP</a>)</li></ul>
Academic Vocabulary
similar, similarity, dilation, rotation, reflection, translation, transformation
Resources
<a href="http://www.uen.org/core/core.do?courseNum=5180#71440">Curriculum Resources</a> : <a href="http://www.uen.org/core/core.do?courseNum=5180#71440">http://www.uen.org/core/core.do?courseNum=5180#71440</a>

Understand congruence and similarity using physical models, transparencies, or geometry software (8.G.1-5)	
<b>Standard 8.G.5:</b> Use informal arguments to establish facts about the angle sum and exterior angle of triangles, about the angles created when parallel lines are cut by a transversal, and the angle-angle criterion for similarity of triangles. <i>For example, arrange three copies of the same triangle so that the sum of the three angles appears to form a line, and give an argument in terms of transversals why this is so.</i>	
Concepts and Skills to Master	
<ul style="list-style-type: none"><li>• Use informal arguments (proofs occur in Secondary Mathematics II) to establish facts about:<ul style="list-style-type: none"><li>○ the angle sum of triangles.</li><li>○ exterior angle of triangles.</li><li>○ about the angles created when parallel lines are cut by a transversal.</li><li>○ the angle-angle criterion for similarity of triangles.</li></ul></li></ul>
