

A Bucket that Squirts

Richard walked a bit farther and decided to stop. He	10
took a strange thing off his back and bent down. He turned	22
something here, and he pulled something there. He pushed	31
and he pumped. Then he pointed a hose in the direction of the	44
dragon.	45
For Richard Brown had built a fire extinguisher!	53
As the dragon blew fire out of its nose Richard squirted	64
water in. When the dragon opened its mouth to roar, he shot	76
water right on the middle of its tongue.	84
Suddenly a strange sound came from inside the dragon's	93
body. The water was boiling!	98
Richard would have squirted some water into the	106
dragon's ears, but he didn't need to.	113
The terrible dragon had turned up its toes.	121
