

Polar Bears

Polar bears live in ice and snow. A polar bear	10
baby is a cub. A cub is born with its eyes closed. It	23
does not have much hair. A cub drinks its	32
mother's milk. The mother keeps the cub warm.	40
The cub grows bigger. Soon the cub can walk.	49
Its mother shows it how to hunt. She shows it how	60
to swim. The cub likes to play. It rolls in the snow.	72
The cub grows stronger. The cub learns to	80
swim. It can find its own food. Now the cub can	91
live by itself.	94
