CACTUS ID, Last name and First name must match exactly what is in CACTUS. Educators who have changed their name must provide proof to USBE. This change can be done by following directions at: <https://www.schools.utah.gov/curr/licensing/additionalprocesses>.

“District Number” and “school numbers” are unique identifiers in CACTUS. Contact Kristin Campbell Kristin.campbell@schools.utah.gov or 801-538-7892 for these numbers. These do not change.

Contract Date is 7/1/2020 unless the educator was hired after November 15, 2020. The school year begins July 1 regardless of the first day of school or if your school is year-round.

Contract Hours and contract days reflect the length of contract. Typically, full time is 1440 hours and 180 days.

Full time equivalency (FTE) is how much of a regular full-time assignment the individual is contracted to do. For example, if someone is contracted for half the school year, his FTE would be 0.5. This would also pertain to an educator who works half the day but all year. This is based on what the school considers full time.

Assignments and the assignment core codes for educators can be found in the private school documents. The core codes must be active and valid. Core codes that are invalid will be rejected and returned. Please use the core short description from the excel spreadsheet. For educators with more than 1 assignment, all the other columns except assignment description, assignment code and percentage are the same. Please see CACTUS ID 1114 and 1115 in the above examples. The percentages for everyone must add to 1.0 even if the educator is working less than full time. Contact Kristin Campbell Kristin.campbell@schools.utah.gov or 801-538-7892 for questions.

After the file is finished please save it with your school name and date. For example: SpiritAcademy_Sept20_2020

Previous year spreadsheets can be requested to facilitate this year's submission. Please email requests to Kristin.campbell@schools.utha.gov

Common Mistakes

Core-codes that are not accurate. Core-codes that end in 000 are not valid core codes. If the core-code is not on the private school core-code list, it cannot be used. Please note some courses change year to year.
