## Introduction

The Utah State Board of Education (USBE) has established a uniform chart of accounts in accordance with Utah Code Annotated (U.C.A.) § 53E-3-501, U.C.A. § 53G-5-404 and Administrative Rule R277-113.

All local education agencies must use the uniform chart of accounts for financing reporting. Local education agencies include school districts, public charter schools, regional education service agencies (RESAs), and the Utah Schools for the Deaf and Blind. For purposes of this document, accounts or account definitions that mention district or school district refers to all local education agencies unless otherwise stated.

A uniform chart of accounts allows USBE to collect and aggregate LEA financial information in a consistent layout which allows for comparison between LEAs and over a period of time. Chart of accounts are based upon accounts as prescribed by the National Center for Education Statistics (NCES) which allow for comparison and insights with public education systems nationwide.

### Mandatory Versus Optional Elements of the Chart of Accounts

USBE has identified the mandatory minimum level of reporting by LEAs. Throughout the Chart of Accounts, this is identified by the "M" preceding the account code and description. Accounts without an "M" are an optional level of detail which is encouraged but not mandatory.

### Data Collections and System of Record

Information shall be submitted and certified annually through the Utah Public Education Financial System (UPEFS).

### Account Mapping

LEAs may establish and maintain an internal chart of accounts, but must map internal accounts to the uniform chart of accounts for reporting purposes. Any account numbers not used in the chart of accounts are reserved for future use and may require future mappings to be established. Account mappings may be set up in your UPEFS account and should be reviewed before each data transfer.

### Conformance with Generally Accepted Accounting Principles

These accounts seek to conform to, and allow for financial reporting in accordance with, generally accepted accounting principles (GAAP) as established by the Government Accounting Standards Board (GASB). As such, financial transactions and positions recognized in governmental fund types use the modified accrual basis of accounting and current economic resources focus. Proprietary and fiduciary fund types use the accrual basis of accounting and economic resources focus. Select accounts listed in this document are only applicable to certain fund types.

The basis of accounting refers to the point in time when revenues, expenditures (or expenses), and the related assets and liabilities are recognized in the accounts and reported in the financial statements. Under the modified basis of accounting, revenues are recognized when they become both measurable and available (susceptible to accrual).

### USBE Review

USBE staff will review submitted actuals data against LEA audited financial statements. Any identified material discrepancies may result in resubmissions and/or corrective action.

### Revenue, Expenditure, and Balance Sheet Account Code Structure

UPEFS submissions require the following account code structure. Uploads must be submitted in comma-separated values (csv) format. Comma-separated values is a text file that uses commas to separate values, and newlines to separate records.

### Revenue and Other Financing Sources
