Foreword

This publication represents the combined efforts of staff members at the Utah State Office of Education (USOE). It is intended to be a single-source review of education-related legislation from the 2016 Legislative Session. This publication is written for state school board members, local education agency (LEA) board members, superintendents, charter school administrators, and school business administrators. It may also be useful to other public education-related organizations and to state legislators.

The main body of the publication reviews each education-related bill that was passed and identifies action that might be taken by the Utah State Board of Education (USBE), local school boards, and charter school governing boards to implement the requirements of the legislation. The publication also contains summary information on funding and bills not passed.

This publication is a service of the Utah State Office of Education, but is not intended to convey any specific direction or assignments for action by the local education agencies. Such requirements, if needed, will come directly from the Office of the State Superintendent of Public Instruction. This publication is also not intended as a formal legal opinion or interpretation of legislative action.

Comments concerning this publication or suggestions for improvement should be directed to Angie Stallings at angie.stallings@schools.utah.gov or 801-538-7550.

Office of the Legislative Fiscal Analyst

Date Modified:

3/17/2016
4/4/2016 15:05

Notes:

- The Legislature increased the Add-on WPU Value to match the Primary WPU Value beginning in FY 2017, returning to one WPU Value for all Basic School Programs. To accomplish this, funding was transferred from the Flexible Allocation Program to increase the WPU Value for the Special Education - Add-on program. The Legislature reduced the number of WPUs for the Career & Technical Education - Add-on program by 2,446 WPUs. All WPUs are now valued at \$3,184.
- Legislators transferred funding from various categorial programs to a new line-item with the State Board of Education to account for administrative costs associated with the programs. This allows the Minimum School Program to only represent direct allocations to local education agencies and administrative expenditures to be accounted for at the State Board of Education where the services occur. Transfers were made from the following programs: Enhancement for At-Risk Students (\$304,800), Youth-in-Custody (\$419,500), Beverley Taylor Sorenson Arts (\$120,000), Critical Languages & Dual Immersion (\$209,400), Adult Education (\$206,100), Career & Technical Education (\$182,700). Adding these amounts to the total appropriation for each program listed above will provide the full cost of the program.
- The State Board of Education was given authority to use up to \$4.3 million in nonlapsing balances from several programs to provide a contingency in case student enrollments are higher than expected or local property tax revenue contributions are lower than expected and to begin development of a financial management system at the State Board of Education. Intent language is included in Senate Bill 2 (2016 GS). Balances in the following programs are targeted for the uses above: Charter School Local Replacement (\$3,098,200), Charter School Administration (\$622,600), and Voted & Board Local Levy Programs (\$710,500). The Voted & Board amount is an estimate for the end of FY 2016.
- The Legislature transferred \$8.0 million in nonlapsing balances from various MSP programs to the Education Fund in FY 2016 (2015 GS).
- In FY 2016, the Legislature transferred \$500,000 one-time from the Charter School Administration program to the State Board of Education to pay current-year costs associated with the Statewide Online Education Program. The funding in the CS Administration program will be back-filled with nonlapsing balances in the program.
- House Bill 119, "Charter School Finance Amendments" (2015 GS) increased the school district contribution to the Charter School Local Replacement (CSLR) program. This reduced the state cost by approximately \$2.8 million. The ongoing \$2.8 million was removed from the CSLR program and added to the Flexible Allocation - WPU Distribution program. The Legislature reduced the appropriation to the Flexible Allocation program by \$2.8 million one-time in FY 2016 to fund one-time priorities. The ongoing funding was included in the FY 2017 base budget (HB 1, 2016 GS) for the Flexible Allocation program.
- Includes one-time amounts (FY 2016 Only).
- Senate Bill 38, "School Funding Amendments" (2016 GS), changed the revenue sources included in the Charter School Local Replacement formula to include state funding appropriated to the Voted & Board Local Levy Guarantee and school district expenditures on recreation. These changes increased the cost of the formula by \$20.6 million in FY 2018. The FY 2017 cost is \$14.4 million, the remaining \$6.2 million will be in the FY 2018 base budget for the program.

BILLS PASSED

<u>HB 1 S1</u> Public Education Base Budget Amendments	
Sponsors	Rep. Eliason, Sen. Stephenson
Bill Summary	Establishes the base budget for the support and operation of public education for fiscal year 2017, beginning July 1, 2016 through June 30, 2017. Provides supplemental funding for the Educator Salary Supplement Program, the Statewide Online Education Program, and increases the Board and Voted Guarantee Rate to \$35.55 for FY 2016.

HB 25 S3 Property Tax Changes	
Sponsors	Rep. McCay, Sen. Henderson
Bill Summary	This bill alters the calculation of eligible new growth and certified property tax rates for each taxing entity in the state, including school districts; breaks out the calculation of new growth between real property and centrally assessed property, which means that the calculation of growth would be done separately for each and the growth in each type would not be permitted to go below zero (meaning negative growth in one property type would not negatively impact positive growth in another property type by offsetting growth in another type of tax); adds project area new growth into the calculation of eligible new growth, which will ensure that taxing entities receive increased property tax revenues in the years following the end of a redevelopment project which was previously receiving tax increment funding; and establishes a “centrally assessed benchmark value,” which is the highest level of assessed valuations since tax year 2015 for centrally assessed property. In order to generate new growth, the assessed valuations for centrally assessed property must rise above the benchmark value. These changes will likely benefit a number of school districts in the state with increased eligible new growth, but some school districts which receive a lot of new growth from centrally assessed property could be negatively affected.
USOE/USBE Action	Potential modifications to Common Data Committee revenue projections.
LEA Action	Awareness of modifications to growth calculations and potential impacts on education funds provided to LEAs for the Basic Minimum School Program.
