

2025-2026 In-Depth Protective Factors Professional Learning Opportunities

The Prevention Team is excited to offer various sessions around the state of the **Protective Factor Framework** training for Local Education Agencies (LEAs) during the 2025–2026 school year. This is a one-day, six-hour training that builds on the foundation introduced during the April 2025 Prevention Workshops. It will provide a deeper dive into the Protective Factors Framework—a research-based, evidence-informed approach proven to strengthen child and family well-being and reduce the risk of unhealthy behaviors in students.

Trainings will be held at multiple locations across the state, and participants will earn **5.5 License Renewal Hours** upon completion.
