This document is the Scope of Work between ASU Prep Global Academy and the Utah State Board of Education (USBE) for EANS Professional Services. Changes may be made to the scope of work only by an amendment to the agreement as described herein.

1) Introduction

a) Purpose

ASU Prep Global Academy ("ASU Prep") will provide services for:

(1) redeveloping instructional plans, including curriculum development, for remote or hybrid learning, or to address learning loss; and

(2) initiating and maintaining education and support services or assistance for remote or hybrid learning or to address learning loss under the Emergency Assistance for Non-Public Schools Fund (EANS Fund).

b) Background

The Coronavirus Response and Relief Supplemental Appropriations Act, 2021 (CRRSA), was signed into law on December 27, 2020 and provides an additional $2.75 billion nationally for the Emergency Assistance for Non-Public Schools Fund (EANS Fund). The EANS Fund award of $23,778,187 was applied for and accepted by the Utah State Governor's Office, and is administered by the Utah State Board of Education.

The Utah State Board of Education (USBE) is distributing these funds by application in alignment with the federal guidance on distribution. This funding is intended to help eligible non-public schools safely reopen schools, measure and effectively address significant learning loss, and take other actions to mitigate the impact of COVID-19 on the students and families who depend on Utah's K-12 non-public schools.

All services must be in alignment with the allowable use cases that are described for the EANS program by the U.S. Department of Education. Additional information can be found here: https://oese.ed.gov/offices/education-stabilization-fund/emergency-assistance-non-public-schools/

c) Key Personnel-

The following key personnel are essential to the performance of the contract. If any of the individuals are no longer part of this project, Contractor shall notify USBE within 30 days. Failure to notify USBE may result in termination of the agreement.

i) Betsy Fowler, Executive Director
ii) Alison Hernandez, Professional Development Manager
iii) Ellie Reich, Training Consultant
iv) Rachel Maleski, Lead Trainer
v) Brian Austin, Lead Trainer

d) Scope of Work

i) ASU Prep Digital will deliver the services outlined below. ASU will work with local school leaders in a collaborative manner to discuss needs, timelines, and preferred launch dates. Implementation planning will also entail determination of whether the training should be in person or online or a combination. ASU will also offer followup online resources, available 24/7/365, and will help establish professional learning communities to give teachers opportunities to support one another beyond the training.

Once a timeline has been mutually established, ASU's team will work with the local leadership to establish a registration process, space planning (if face to face), length of training, and follow up. ASU will offer both face-to-face and virtual training, or a combination. If virtual options are used, ASU will provide online platforms and systems necessary.

Following the training, teachers will have access, as noted, to ongoing materials. Follow-up training is also an option, or a staggered training approach may be appropriate depending, again, on need. ASU's training team will conduct follow-up participant surveys both to ensure the training value to participants and to use feedback for ongoing improvements. ASU will consult with local leaders to share survey results as well as a measure of transparency and ongoing conversation.

ii) ASU will provide the following:

Category A: redeveloping instructional plans, including curriculum development, for remote or hybrid learning, or to address learning loss

1. Professional learning in using digital content for remote or hybrid learning specific to the K-12 education system.

The ASU Prep network includes site-based and online K-12 offerings, and the ASU team is composed of veteran leaders in tech-supported learning who are adept at training teachers to use digital content in a variety of settings and for a variety of use cases at the K-12 level. Though digital learning can support many common needs across the K-12 spectrum, ASU has designed several models throughout the nation, each unique to the specific identified needs in a given area.

2. Professional learning for adapting curriculum and instruction to address variable levels in learning caused by COVID-19.

When online learning is done well, teachers have a great deal of leeway to modify, supplement and augment instructional curriculum and instruction to address each student's needs. Online learning systems do the heavy lifting by providing data that helps teachers identify needs and then pairing the data with searchable system resources. ASU's training will equip teachers to use the data to adapt instructional content and strategies as needed to address learning needs.

3. Professional learning on specific interventions related to addressing variable levels in learning caused by COVID-19.

In response to the learning challenges presented by COVID-19, ASU Prep Digital entered a partnership with the state of Arizona to provide statewide teacher training in best practices related to online instruction and learning. These practices have withstood the test of time and have made the difference between high quality and sub-standards online programs.

Online systems provide teachers with the critical data they need to make decisions specific to each learner's needs, and the 1:1 affordances of the online environment provide the means to apply such information quickly. Likewise, a flexible learning environment supports students by allowing them to work at individualized cadences, revisit materials, and make continual progress at individual levels. ASU's training operates from the premise that while all students have certain learning, skill, or knowledge gaps that must be individually addressed, they likewise all also have areas where they are ready to progress and even thrive. The training shows teachers how to help students address the gaps without losing sight of opportunities for acceleration.

4. Professional learning on adjusting online or in-person curriculum to differentiate and personalize it for different learning levels.
Quality online learning content and systems are adept at providing rich formative feedback, thus empowering teachers with specific details about the tasks or knowledge that may be presenting a challenge to individual students or groups of students. Using the data, ASU shows teachers how they might plan accordingly (i.e., schedule 1:1 or small group tutoring, conduct a live lesson on a specific area of struggle, provide additional resources, etc.) Moreover, ASU will provide teachers with a set of strategies for monitoring student progress and proactively coaching students to help them gain ownership in their own learning journeys.

5. Professional learning on managing classrooms containing both remote and in-person students
ASU has supported multiple districts and models, including hybrid, blended, remote, and a combination of all of the above. ASU's site-based schools, in fact, will be transitioning to offering these models on an ongoing basis beginning in fall of 2021. In addition to incorporating blended learning into traditional programs or designing hybrid learning models, ASU will also provide training on how to optimize learning and engagement for students who are working in a completely virtual environment.

6. Professional learning on digital citizenship
ASU's training recognizes that not all students come to a tech-supported learning environment with the skills or knowledge about how to work respectfully and collaboratively with others. ASU provides training on how to include learning support as students learn not only how to work together but also how to recognize what is and is not acceptable or even lawful behavior in the online learning environment.

7. Professional learning in the use of assessment to identifylearning levels and skill development
The beauty and challenge of the digital environment is the copious data that results not only from student activity in the system, but also from embedded assessments. The challenge for teachers is in knowing how to decipher and use the data. Today's online learning systems have shown improvements in making the data more visual and actionable, but teachers can benefit from training in what to look for and how to use the data effectively.

8. Professional learning in meeting the needs of students with special needs who have been disproportionately impacted by disruptions in education.

Quality online learning environments are created to accommodate a myriad of learning needs; thus, most affordances provided by both the technology and the design will address a wide range of special needs. ASU's training will help teachers understand those affordances and built-in accommodations, as well as their limitations in order to know where additional human or hardware support is required.

9. Professional learning focused on embedding accelerated learning principles and strategies into classroom instruction.
While all students will need help getting around hurdles at times, whether due to a learning gap or simply a particularly challenging learning sequence, all students are ready to move forward in other areas. Online learning accommodates this uneven nature of learning by allowing acceleration in one area while an area of challenge is being addressed. Learning to manage instruction where students in a given "classroom" may be all over the map in a learning progression requires a new set of instructional skills which our training provides.

10. Provision of remote or hybrid learning instructional plans for learning to address learning loss.
ASU's training will delineate how to assess learning loss and plan for intervention with the use of tech-supported learning environments. Training will address topics such as assessment strategies and tools, using assessment results for planning, designing hybrid learning environments, supporting remote students, and more.

Category B: initiating and maintaining education and support services or assistance for remote or hybrid learning or to address learning loss

1. Online tutoring services specific to address variable levels of learning resulting from disruptions due to COVID-19.
ASU will ensure that only certified instructional staff serve as tutors. ASU's teachers work one-on-one with students in synchronous digital environments to provide personalized support. Even as ASU scales the program to meet student needs, they will not sacrifice quality in faculty tutors and will not sacrifice individualization in instruction. ASU's teachers work closely with students to determine each learner's level of readiness and to create a tutoring plan. Weekly tutoring sessions provide the foundation and scaffolding to help students address learning gaps and, eventually, progress to grade level or beyond.

2. Services to groups of students (e.g. summer classes) to address variable levels in learning resulting from disruptions due to COVID-19.
ASU will provide content-specific (Math, reading, STEM, etc.) virtual summer programming. One example is Math Momentum. Whether the issue is learning loss, skill reinforcement, or advancement, Math Momentum enables students to move forward. A similar program for reading is another option, as are options in many other areas, such as STEAM, language, writing, and more.

3. Providing instructional materials to students appropriate for use at home to mitigate disruptions in learning due to COVID-19
ASU Prep Digital is not only a provider of courseware but is also a full-time academy, serving students both in Arizona and beyond. As an accredited K-12 preparatory program, the ASU network of schools offers a high quality, rigorous curriculum. ASU's model served students well during the height of the

pandemic and beyond because a full offering of high-quality programming was already available for virtual learning. ASU's teachers will, therefore, have access to materials that students can use at home.
